

## **From the Desk of Fmr. Vice President Seldom237**

Seldom237 (R-DX) - On this day of 9/27/2021

To the members of the Dixie State Assembly...

### **On the matter of the Bills and Budget currently in the Dixie State Assembly**

---

To the members of the Dixie State Assembly,

I've been watching the affairs of the Dixie State Assembly quite closely over the past few weeks, and I've noted a continued happening, something that's been going like clockwork. So reliable, you can count on it. The consistent failing of the Consolidated Omnibus Measure for Managing and Utilizing Nominal Imposts, Securities and Measures Act, or the COMMUNISM Act. One can only imagine how much the poor State Clerk working for the Assembly is feeling. The Dixie State Assembly has rejected the COMMUNISM Act several times now, and I would applaud them for rejecting this utter nonsense. As the chair of the House Finance Committee, I know I will soon have to make similar choices. I will need to work through the creation of a budget for our nation, alongside the Speaker of the House and the President of the United States. I know I can look to the steadfast example of the Christmas delegation to find the courage and will we need to get a budget passed. Of course we need to bring in all sides, of course we need to represent the American people, but we also must be sure to stand for the principles that the people elected us to stand for, as I know I will. Just as well, I want to draw attention to something in the most recent state Assembly bill released by the Dixie Democrats. They just released three bills, [B. 125](#), [B. 138](#), and [A. 007](#). One that just looks at the electoral college and pays a million dollars to do it, one that would legalize polygamy, and one that would change the state's name, from Dixie to Douglass. Interestingly, however, each of these three bills in one form or another, has failed in the Dixie State Assembly before. Each of them has been voted down, none of them signed in. So why are the Democrats treading over old ground? Why not move forward with progress, as they claim to do so often? Why not move on to different topics that the Assembly hasn't already rejected?
