

Welcome to Three To Know from Fort Zumwalt School District.

This episode: Connecting with our App

Did you know Fort Zumwalt App subscribers have access to important reminders and tools?

1 Download the Fort Zumwalt App, go to the menu and set your default school in settings. This will ensure your app opens to the information you want the most -- information from your student's school! While in settings, select other schools you want to be able to check quickly. You can use the Schools button in the bottom right. Set it to "See My Schools Only" for quicker navigation.

Remember, while you're in settings, to use the Push Notifications section to select the schools you want to get notifications from. Be sure to include the district! Now when your school or the district sends an important message you can be notified through the app. You can also revisit past notifications using the link in the menu for each school.

2 Once you are connected with your school, use the menu to see the dining selections for breakfast and lunch. Use the filter tool in the top right to select a range of dates you hope to see.

3 Back in the menu, you can connect with specific calendars: school events, the district calendar, letter days for elementary and middle schools, or clubs. This will allow you to sync specific events to your personal calendar.

When the calendar you're interested in has loaded, just use the arrow on the right side of the event you are interested in sharing or adding to your calendar.
