Keep an eye out for oddly behaving records in the archive. Solar crashing and the like. The image viewer, specifically, was corrupted and caused Islandora to crash. 'Twas an old Eagle County record.

Additional groundwork needs layin'--including the sandbox instance of Islandora 2.0 for testing purposes. Without it, not much else is possible. Tasks for the working group await its availability. Construction will begin shortly.

The evolution of a platform:
Sandbox > Test Site > Production
