# BIP-20: 💰 Idle Finance Integration Bounty

Goal

Through this governance proposal, we want to reward @adamb (username in discord) for the development of the Idle Finance Integration with **250 BABL**.

Summary

With the [release of our SDK](#), anyone can now create an [integration](#) that connects Babylon to any other DeFi protocol.

We offer $5k as a bounty (in BABL) for every integration developed that is part of our wishlist. You can see the [wishlist here](#).

@adamb developed two integrations, one for the Best Yield Product and one for the Tranches Product of [Idle Finance.](#)

Here is the Pull Request with the code for the two products and tests.

https://github.com/babylon-finance/contracts/pull/8

Given that the integrations are connected but they are still two different smart contracts, we settled on a **total bounty of $7.5k or 250 BABL for the two integrations**.

Funds Needed for this proposal

The treasury will allocate the following funds:

- 250 BABL as a reward for the user @adamb

Status & Process

- The proposal is in voting status.
- Discord will be used to discuss this proposal with the community.
- An on-chain proposal will be created using [Tally](#).
