

Treble Clef Paper Quilling

Paper quilling is the art of paper filigree using paper strips to turn into different shapes and turn them into beautiful art. This 3D art is suitable for kids aged 10-12 years old. Let's start this project, by downloading and printing out the HD treble paper quilling pattern in 5 x 7 at least 220gsm with pattern shapes and without in this craft project you have the freedom to choose what shapes to use but if you are looking for inspiration we prepare treble clef with prepared shapes pattern and sizes just follow the step-by-step Treble Clef Paper quilling. You can also watch the time-lapse video for reference.

Materials:

- HD treble clef paper quilling pattern
- Paper Strips 3mm
- Quilling needle
- Circle sizes
- tweezer
- Scissor

Time Preparation: 10 minutes

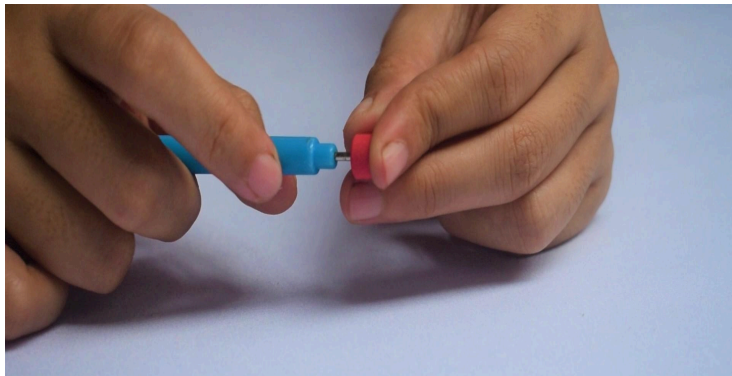

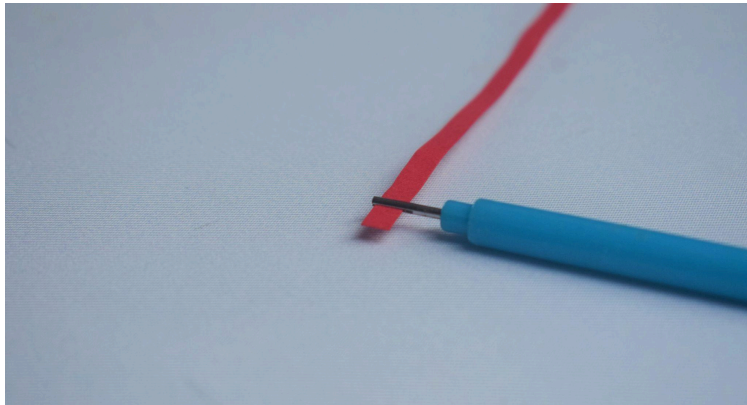

Time Creating the Project: 60 minutes

STEP 1- Create paper quilling shapes that we will use in Treble Clef paper quilling art project.

a. Tight Coil

Insert your paper strip in the quilling needle.

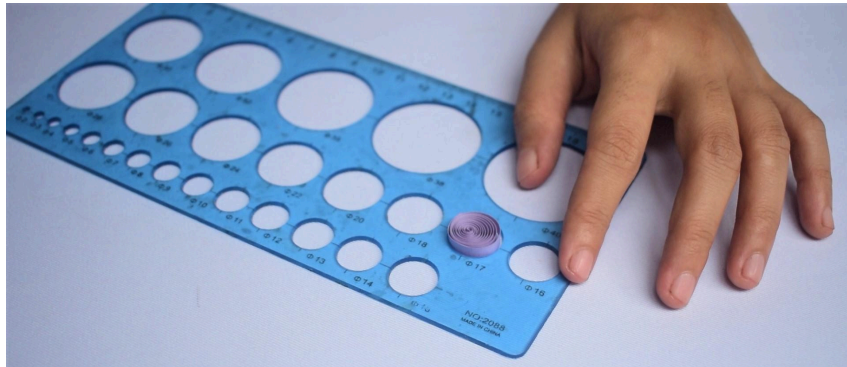

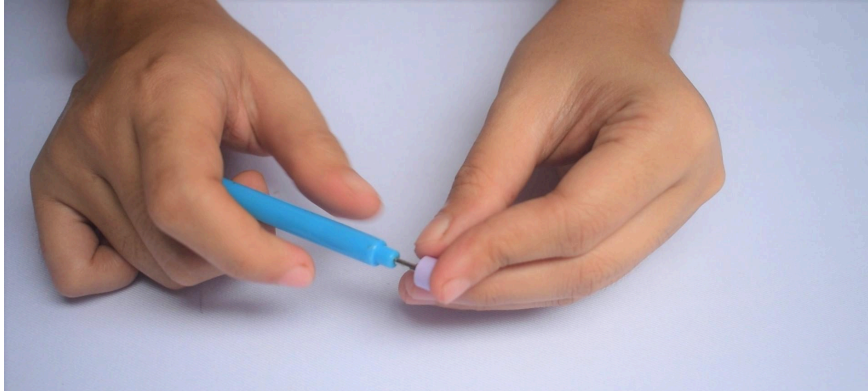

Line up the paper with the edge of the slot as Roll the tool with your dominant hand either towards you or away from it, while holding the strip.

When you're almost finished, place a dab of glue near the end of the strip and roll completely.

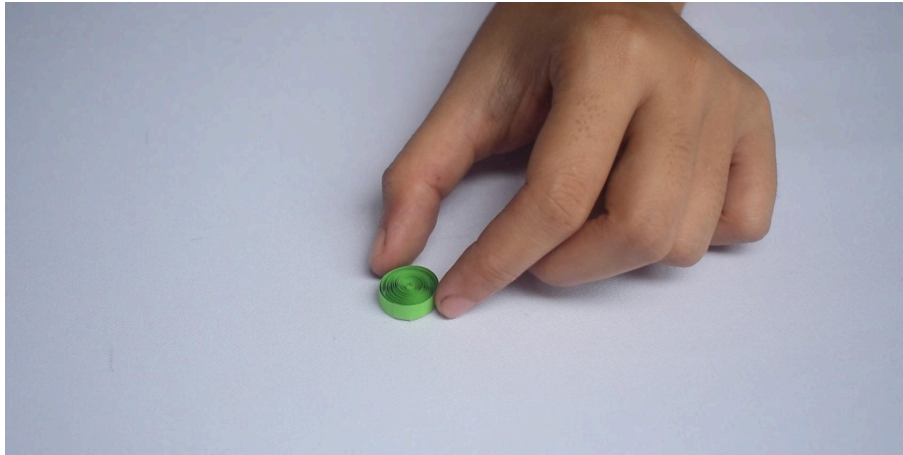

b. Loosen Coil- Create a coil, remove it from the needle tool, and allow it to expand using circle sizers.

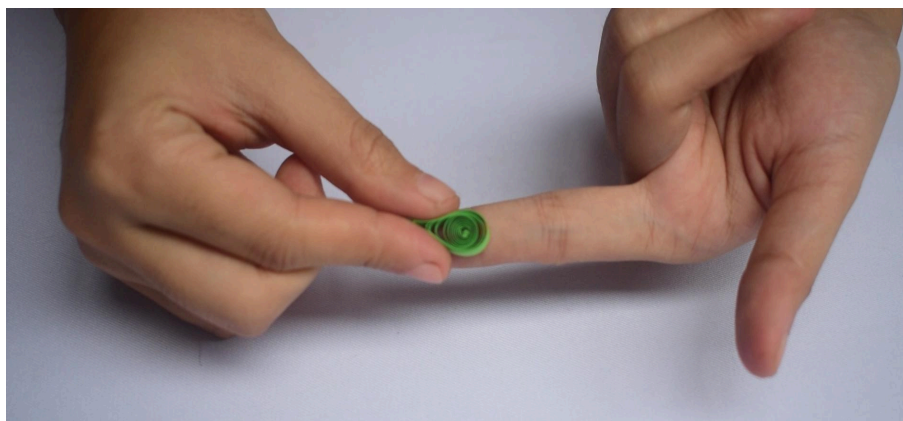

Add a dab of glue and press it carefully to seal the paper strip.

c. Teardrop

Make a loosen coil, arrange the inside coil evenly then pinch the paper where you want the point to be to create a teardrop shape.

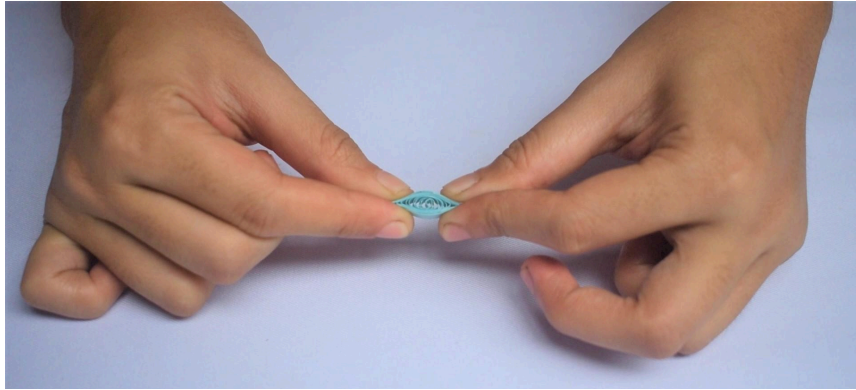

place it between the thumb of the forefinger of your non-dominant hand.

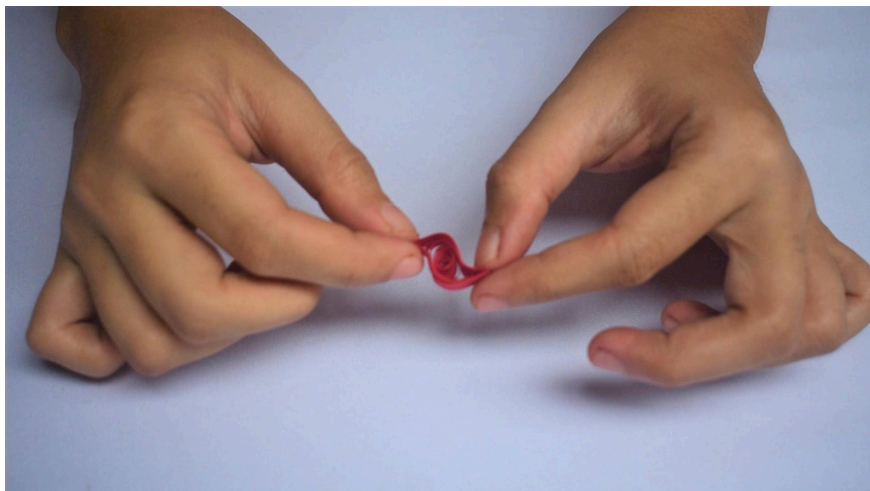

d. Eye

Make a teardrop shape, then pinch the opposite side and glue the end of the strip.

f. Marquise

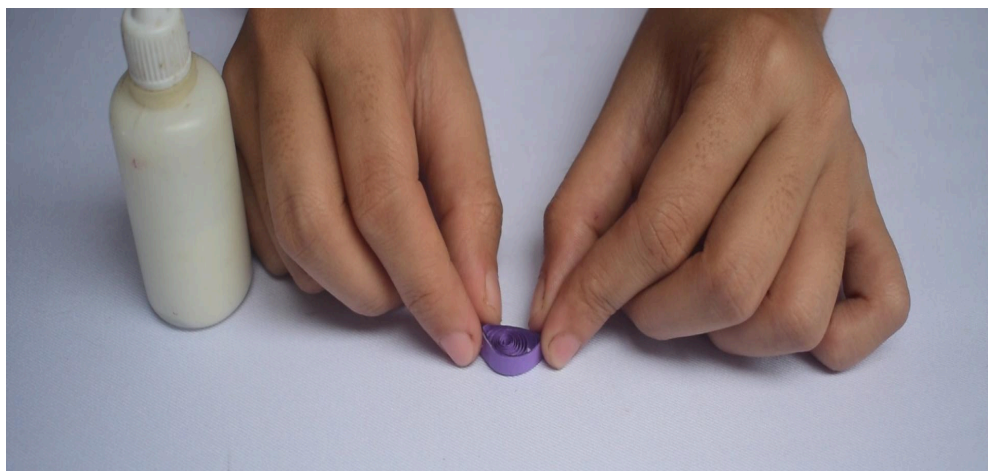

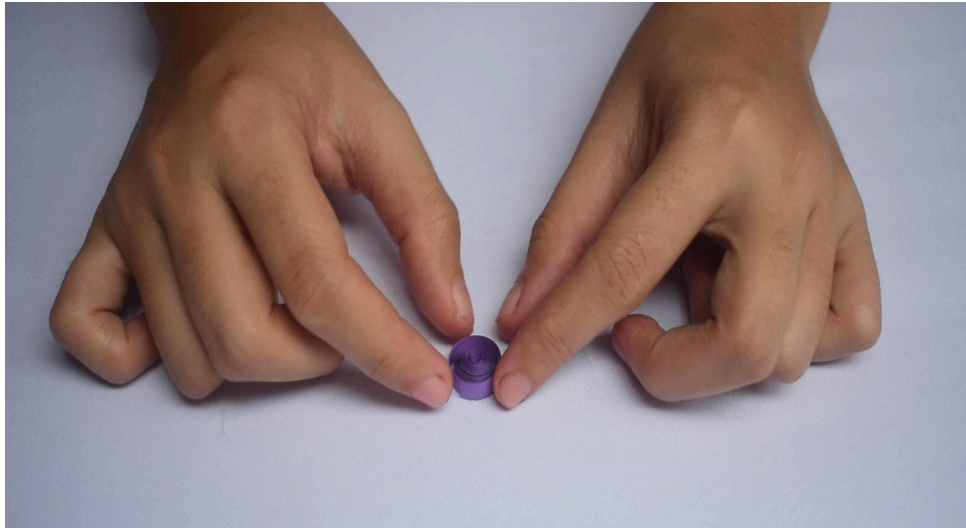

Make eye shape and pinch another side upward and side downward.

g. Semi-circle shape

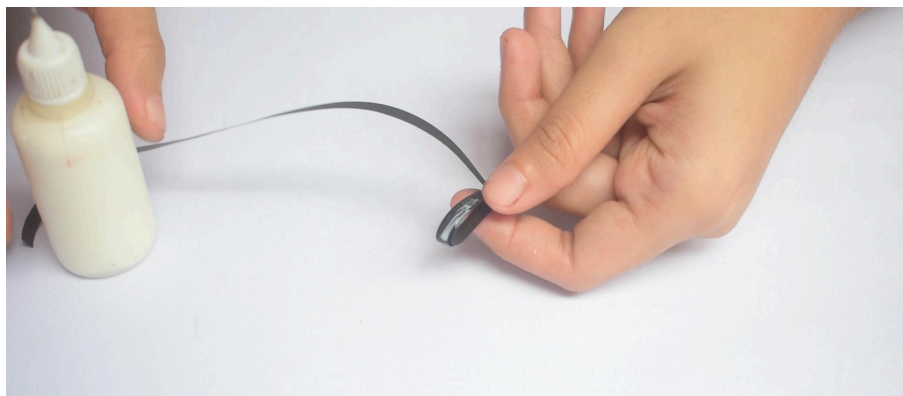

You can do this by pressing an open coil onto a hard surface like a table and sliding your fingers down the sides carefully.

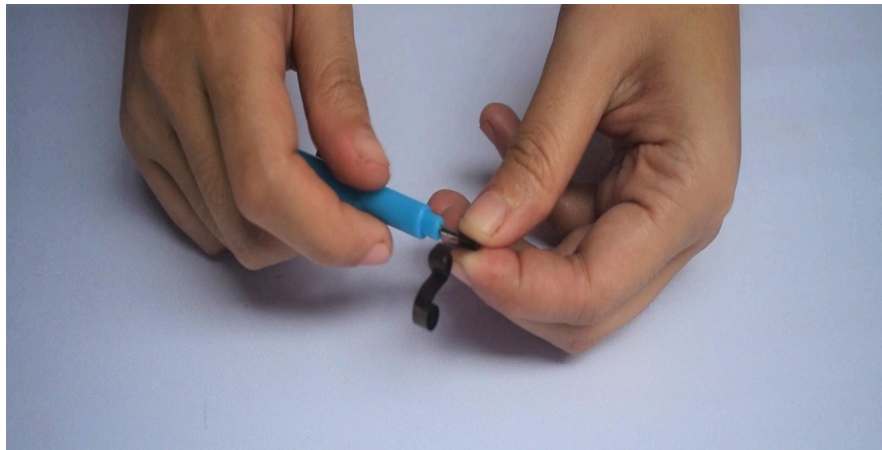

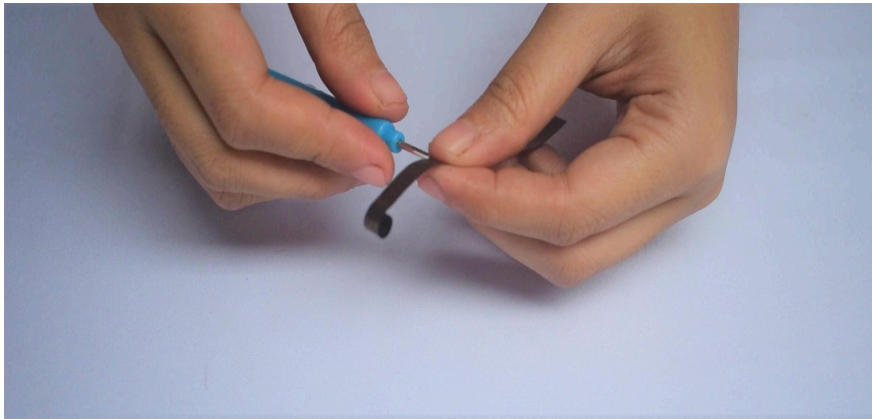

j. oblong coil

Glue the end of the strips and fold the strip and apply glue on each side until you get the shape then cut the excess paper strip.

k. beehive

Roll it towards the end. Essentially, the slotted tool will roll the quilling paper around itself, pulling in both ends of the strip at the same time.

The size of your coils will depend on the number of turns you make with your tool in each roll. More turns will make larger coils, and fewer turns will make more of a wave shape to your strip.

Step 2- Outline and design the inside part of the treble clef

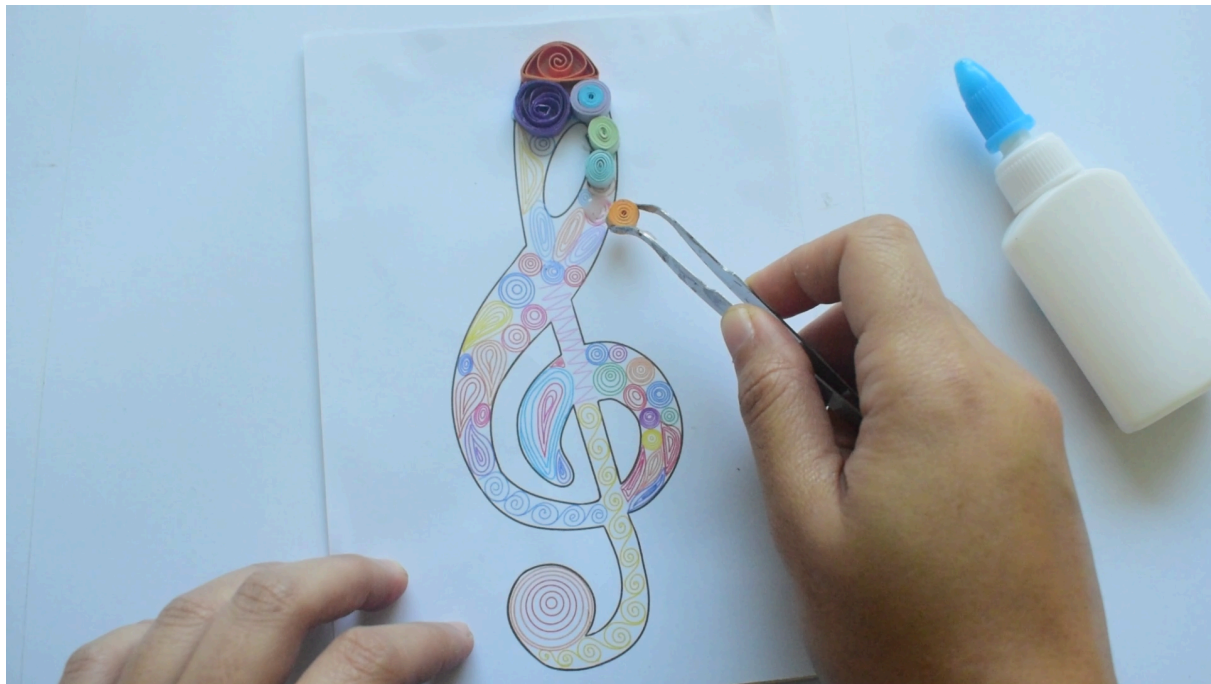

We will start assembling the Treble Clef in the upper part to downward after we prepare the shapes ahead of time now it's time to assemble it.

For accurate sizes and numbers of paper quilling strips to use in this project check the table. You can create this ahead of time and attach the quilling shapes in Treble Clef's outline or you can create it one at a time and attach what you prefer. The sizes and number of paper quilling strips may change depending on the paper quilling size to be used.

Quilling Shape	Number of Paper Strips Use	Circle Sizer	Length	Quantity
 Half Circle	1 paper strip	20	---	1pcs
 Eye	Half paper strip	17	----	1 pc
 Oblong coil	1 paper strip	11	----	3 pcs

 Loose coil	1 paper strip	17	-----	1pc
 Tight coil	1 strip 2 combine strips $\frac{1}{2}$ strip	9 11 7	---	4 pcs 1pcs 3pcs

Reminder: Clean the tip of the tweezer with a tissue or small cloth every time you use attaching both ends of strips or it is applied glue.

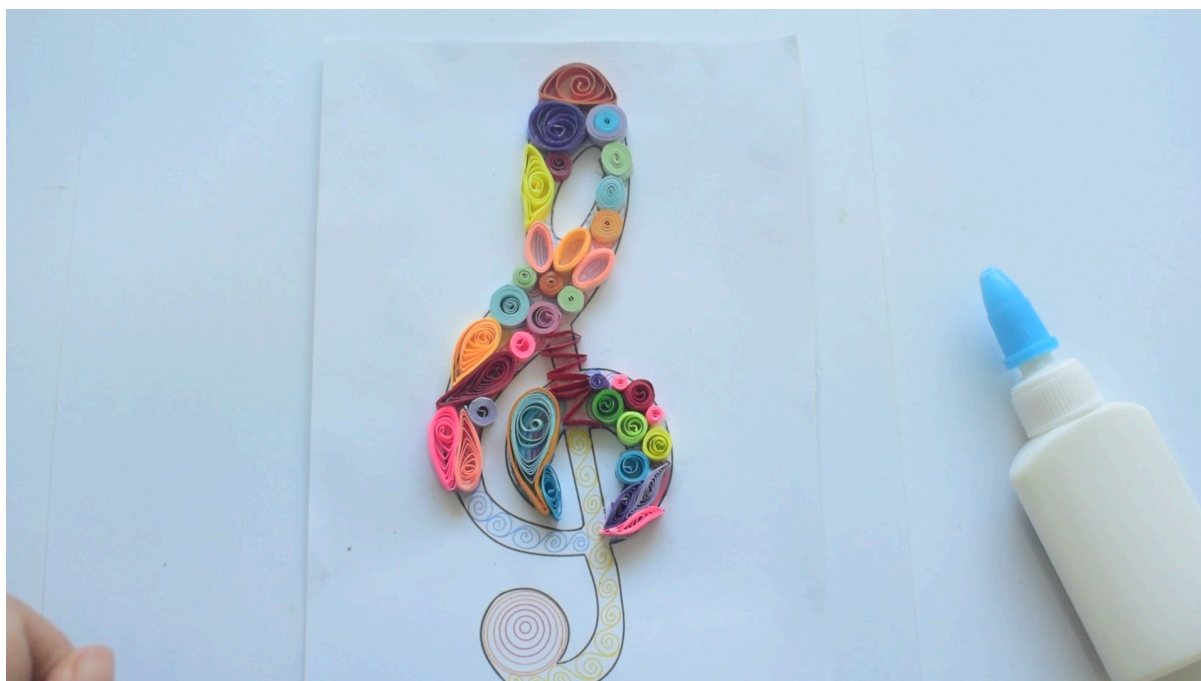

A slight push from your finger can help to fit the paper quilling shape with the tweezers. You can ask for help from grown-ups if you're having a hard time but I believe in you you can do it! :)

Let's accomplish the left side of the Treble Clef Paper Quilling

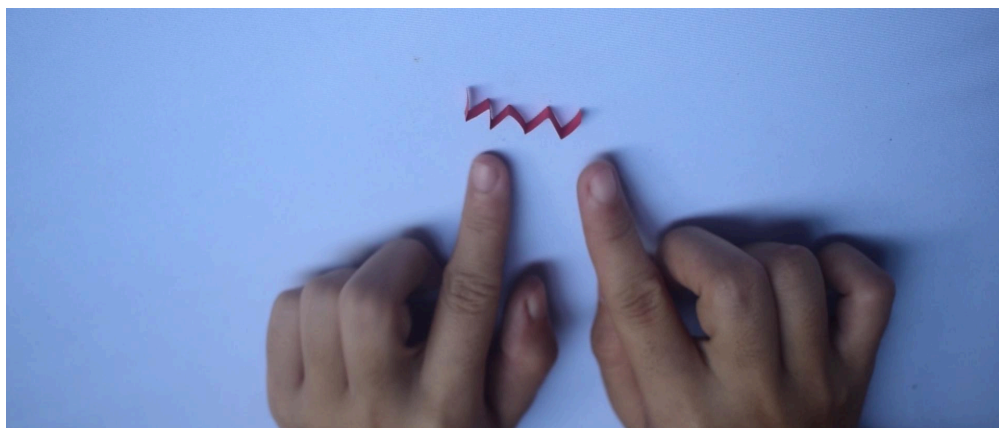

Quilling Shape	Number of Paper Strips Use	Circle Sizer	Length	Quantity
 Tear drops	1 paper strip	19 18 17	----	1 pc 1 pc 2 pc
 Loose coil	1 paper strip	11	-----	2pc
 Tight coil	½ strip	9	---	2pcs

Middle and Right side part of Treble Clef Paper Quilling

Quilling Shape	Number of Paper Strips Use	Circle Sizer	Length	Quantity
----------------	----------------------------	--------------	--------	----------

 Tear drops	2 combine paper strips	29	----	1 pc
 Loose coil	1 paper strip	8	-----	5pc
 Tight coil	$\frac{1}{2}$ strip	5	---	5pcs
 Marquise	1 strip	10	—	3pcs

Create an accurate zigzag, measure it in a half-centimeter and fold it then ready to attach.

Middle and downward part of Treble Clef Paper Quilling

Quilling Shape	Number of Paper Strips Use	Circle Sizer	Length	Quantity
 Tear drops	1 paper strip ½ paper strip	—	----	1 pc 1 pc
 Loose coil	1 paper strip	22	-----	1pc

Tadaaaa! Our finished output of Treble Clef Paper Quilling. In this project enjoy the fun of creating different shapes from colorful paper strips. Be patient and appreciate the process of creating this art. From this knowledge, you can create different paper-quilling designs.
