

Rereading your image of future for 2040 that you had written before the course (I emailed you the text you had written), to what extent do you think it has changed?

- Not at all changed
- Slightly changed
- Definitely changed
- Totally changed

How has your image of the future changed by 2040? What is the issue or topic that is important to you now that you would like to see changed or improved? What would you like the future to look like?

If your idea of the future has changed even a little, would you like to write to me what do you think this change is due to? To the simple fact that a month has passed, to some of the topics covered in the course (which ones?), to the activities carried out (which ones?)...
