Eyeke Community Council

A structured game platform for community engagement in governance

This is a live, dynamic plan which will be updated as needed. A snapshot of this plan prior to Council 1 is linked here.

General Information

Summary

The Eyeke Community Council is an independent community of players engaged in supporting the Planet Eyeke ecosystem testing governance and engagement models. Each quarter the Council evolves to adapt to what is working for the active community members during that time.

Models included are subject to change by the Council Coordinator in conjunction with the Council Advisors, based on experiencing the gameplay, interest in the committee topics, player engagement, needs identified by the Council of the Committees and any other unanticipated factors.

Council Season 3 (Q1 2024)

Trilium Rewards & Allocation Distribution Model

About
The Eyeke Community Council is an independent community on Planet Eyeke which gathers in Telegram in support of creating the community-built Metaverse on Planet Eyeke. The Council is composed of 18 creator Committees. The Council has been supported by Planet Eyeke proposals.

Council 1
During Council 1, the Community Managers of the Committees were appointed and they selected their committee members. Some were very engaged and some focused on continuing their usual activities related to the Committee topic. Discussion was the primary focus in the Telegram group @eyekecouncil.

Council 2
During Council 2, the Committee leaders were elected, which was more an issue of friendship over interest or availability to serve. Although some players continued to be very active, some were not. Although progress was made on each topic, the members voted to not reward December allocations due to the low activity in the Telegram groups. Project managers continued to evolve their communities and projects in small groups.

Council 3
During Council 3, we go back to appointing Council members. The Committee leaders are being appointed to test the Bounties Game Round 1. Rather than a vague process where members gather to recommend proposals each month, we are adding a system where players can claim bounties, complete them and after confirmation, earn rewards. The Bounties Game team will post and review bounties and their completion claims. In addition, the Council members can recommend the bounties for the following month, based on the available Trilium.

At 4% Distribution	TLM/month	TLM/quarter	Est. # of Monthly Players
Rewards Pools	TBD	TBD	TBD
TOTAL to Eyeke Council Account	28 Individual Accounts 12 Community Accounts		

Patrons
Patrons can send contributions for bounties (general or specific via memo) to the WAX account **eyekecouncil**

Bounties
Bounties can be found at the **bountiesgame** account.

Council Season 2 (Q4 2023)

Trilium Rewards & Allocation Distribution Model

Although the number of members in the Eyeke Council can be seen by the number of players in the @eyekecouncil Telegram Council (as of September 30, 2023 it is at 111 members), some of the members play additional paths to earn Trilium. Council 2 will include the following Trilium Allocation. Considering 18 Committees, this is the model. Note: this accounts for the Trilium allocation being doubled with the 4% increase which will need to be confirmed.

At 2% Distribution	TLM/month	TLM/month Total	TLM/week	Est. # of Monthly Players
Community Managers	18 x 8,000	144,000		18
Committee Members	18 x 4 x 2,000	144,000		Up to 72
Rewards Pools	18 x 4,000	72,000		Est. 20
Council Coordinator	34,000	34,000		Included
Council Advisors*	3 x 8,000	24,000		1
Custodian Alumni Advisors for the First Year (From Week First Approved)**	5 x 2,000	10,000		Included
TOTAL to Eyeke Council Account		428,000	Approx. 107,000	Est. 110 Plus Eyeke Council Group Members not in Committees, Est. 20 Est. Total 130

This model accounts for supporting 4 weeks per month (or sooner) and does not account for fewer than 5 committee members, which could occur.
*Duane Phillippi, Danish Crypto, Broken Dollz, Michael Yeates (doesn't accept rewards)
**Custodians from the first week approved include: Gnome, Lisa, Duane, Snip and Fury

New: Theme Goals

In order to take advantage of potential synergies of active groups working together, the following is being proposed as Theme Goals for consideration by the Committees.

It is encouraged that each Theme has a Project Manager to help ensure the goals are being pursued and achieved.

- Theme: Code
  - For Consideration Primarily by Committees:
    - Blockchain
    - Technologies & Development
    - Open Source Software
  - Goals
    - To use the methods OSS has been using with the Blockchain name

- ■ Integrate blockchain theory into the OSS strategies being used
- ■ To provide updates on Planet Eyeke supported technologies in development and use
- ■ To educate players and developers on the available Code for development
- ■ To define code, interfaces and delivery mechanisms needed to support community initiatives and goals
- ■ To explore and create uses of AI for creators and communities
- ■ To provide an opportunity for developers and development minded players to vote on key initiatives, uses of Trilium and custodians

● Theme: Entertainment
  ○ For Consideration Primarily by Committees:
    ■ Communications
    ■ Design
    ■ Social Media
    ■ Entertainment

  ○ Goals
    ■ To create a cohesive messaging plan
    ■ To design and implement play paths
    ■ To create and share engaging social messaging
    ■ To add entertainment and play throughout the day
    ■ Support the creation of player leaderboards
    ■ To create entertainment for social media
    ■ To provide new playpportunities through engaging entertainment
    ■ To experiment with watch to earn solutions
    ■ To identify code needed to support new entertainment
    ■ To create a presence on YouTube with daily recurring playpportunities
    ■ To promote Eyeke and Eyeke's communities and projects through video
    ■ To establish a presence in emerging spaces
    ■ To define Community Driven Media messaging
    ■ To provide an opportunity for creators and their communities to vote on key initiatives, uses of Trilium and custodians
    ■ To provide an opportunity for players in social media to vote on key initiatives, uses of Trilium and custodians

● Theme: Marketing
  ○ For Consideration Primarily by Committees:
    ■ Communities
    ■ Data
    ■ Lore
    ■ Marketing
    ■ Science and Engineering
    ■ Welcoming
    ■ Social Media

  ○ Goals
    ■ To plan marketing to players through the communities and to community managers with opportunities for their community members

- ■ To maintain a list of communities
- ■ To provide an opportunity for marketing minded players to vote on key initiatives, uses of Trilium and custodians

- ● Theme: Events
  - ○ For Consideration Primarily by Committees:
    - ■ Games
    - ■ Social Games
  - ○ Goals
    - ■ To create and identify opportunities for events and activities on Planet Eyeke
    - ■ To determine opportunities for Interplanetary Activities
    - ■ To provide an opportunity for event and activities creators and their communities to vote on key initiatives, uses of Trilium and custodians

- ● Theme: Games
  - ○ For Consideration Primarily by Committees:
    - ■ Games
  - ○ Goals
    - ■ To connect games to Planet Eyeke
    - ■ To distribute TLM through games to players throughout the Metaverse
    - ■ To determine uses of TLM in games connected to Planet Eyeke
    - ■ To create player leaderboards within and across all games
    - ■ To determine playpportunities that can be shared with players
    - ■ To provide an opportunity for players of games and game creators to vote on key initiatives, uses of Trilium and custodians

- ● Theme: Governance
  - ○ For Consideration Primarily by Committees:
    - ■ Diplomacy
    - ■ Governance
  - ○ Goals
    - ■ To add a permanent facility for Diplomacy at the Center for Governance
      - ● To create materials for communities on use of diplomacy
    - ■ To support Committees and Communities with Governance Solutions
      - ● Define available solutions
      - ● Define services
      - ● Understand the related concepts
    - ■ To support promotion of services available through Planet Eyeke's communities
    - ■ To provide an opportunity for governance minded players and their communities to vote on key initiatives, uses of Trilium and custodians

Polls were asked about new possible Committees. The spirit of the results was incorporated into the committees proposed. A new committee is being voted on: Entertainment.

Responsibilities

Committee Community Managers
In the Telegram group, there is a topic for each Committee. The Community Manager is responsible for:

- [ ] Engaging the Committee Members in:
    - [ ] Discussion about the Theme Goals
    - [ ] Discussion about allocation of the Committee's Trilium for the quarter
    - [ ] Establishing committee goals or milestones
    - [ ] Launching and/or supporting relevant projects
    - [ ] Deciding on the allocation Committee's Trilium for the quarter
    - [ ] Requesting additional Trilium from Planet Eyeke, if needed to support initiatives
    - [ ] Reminding Committee members to apply and vote for the next election

Discussion will be added to each Committee's Notes document which chronicles the History based on the notes from the Topics group. They are linked on the list of Committees from the Committee Name.

Committee Members
Committee members chat in Eyeke Council Telegram chat Topics and engage in discussion on how to allocate the Committee's TLM. Optionally, they can launch or support relevant projects.

Advisors
Advisors support Committee members with questions in support of their efforts and of the Coordinator in supporting the program.

Committees

A committee is led by a Committee Community Manager. Committees can have up to 4 additional community managers.

Message to incoming Community Manager:
Congratulations! You have been elected as community manager or the abc committee. Your first TLM rewards have been sent. To unlock the second tranche of TLM rewards in November, please post your committee's goals and plans in your committee's topic. To unlock the third, please post your committee's progress, successes and lessons by December 20th or sooner.

In addition, please post your committee's monthly or quarterly requests for uses of Trilium in your committee's topic by indicating the amount, the wallet, the project name and the project summary. Once the Trilium is available to allocate, it will be sent in the order of the requests received unless further information or research is required.

Also note that this quarter, there are some topical goals for consideration. Find the responsibilities, goals for consideration, lists of members and the notes section here:
https://docs.google.com/document/d/1CLbW83veQuWheTGg15cWyqyyWocevTd-1f6ocdMMVOg/edit#heading=h.z5g0o9tpu83v

Let me know if you have any questions. Congratulations and thank you for your service to Eyeke!

Message to incoming Committee Member:
Congratulations committee members! Your first TLM rewards have been sent. Once your committee's goals and plans are posted in the committee's topic by the committee's community manager, the November's TLM will be unlocked. Once the progress, successes and lessons are posted in December, the third will be unlocked.

Committee (Link to Notes)	Description	Community Manager & Committee Members
Blockchain	Identify and share the core concepts of blockchain, blockchain games, decentralization and related topics. Explore player education about blockchain-related concepts and shared values and how Planet Eyeke can facilitate those important play paths.	Community Manager: Danish Crypto Committee Members: Spacewrangler Noam Snappeh Virtunic
Communications	Create and distribute Planet Eyeke publications and communications including newsletter, press releases and training resources such as Gitbook.	Community Manager: Danish Committee Members: Jessika Royce Umesh
Communities	Identify communities playing Alien Worlds and together with other committees, connect them	Community Manager: Ajay

	to resources on Planet Eyeke.	Committee Members: Spacewrangler Mr. T DanishCrypto Wizza
Data	Identify data needs to support Planet Eyeke projects. Work with the Data Microship to identify methods for counting the number of players and adding new player games and experiences to the number of players leaderboards. Identify data sources for players needing development support and new data needs.	Community Manager: Melissa Committee Members: Danish Spacewrangler Joe Snappeh Noam
Design	Provide community art for use in the Alien Worlds Community Metaverse to connect and inspire creators. Identify and support art needs with open source sets of content and art needed to support the launch of projects supported by Planet Eyeke.	Community Manager: Bini Committee Members: Spacewrangler Joe Noam Wizza Pizza
Diplomacy	Identify and design diplomacy missions when Custodians identify a need for player to player or interplanetary diplomacy missions.	Community Manager: Fury Committee Members: Jessika Master ID Mjam Majic
Entertainment - new committee	Create entertaining videos for YouTube and social media that include Playpportunities.	Community Manager: Lisa Committee Members: - tentative Bini Joe Royce
Events	Identify and create sustainable events and activities for players.	Community Manager: Snip Committee Members: David Harris Spacewrangler Joe Mr. T Mother Theresa
Games	Identify games to connect to Alien Worlds and invite them to connect to Planet Eyeke and explore how to meld with the Alien Worlds Metaverse.	Community Manager: Mr. T

		Committee Members: Mother Theresa Starry Night DanishCrypto David Harris
Governance	Identify opportunities for governance experiments and governance models that can shared with players. Support the Center for Governance on Planet Eyeke.	Community Manager: Eric Westreich Committee Members: Duane Joe Danish Vlad
Lore	Identify Planet Eyeke lore and make it available for use and extension by Planet Eyeke players.	Community Manager: David Harris Committee Members: Lysandra Starry Night Spacewrangler Joe Wizza Alfred
Marketing	Create play paths and related messaging in support of Planet Eyeke players on Planet Eyeke website, social media and public outlets. Identify opportunities for sponsors to support Planet Eyeke initiatives and the weekly allocation pool of rewards.	Community Manager: Red Committee Members: Danish Lysandra Spacewrangler Joe Wizza Alfred Jessika
Open Source Software	Identify opportunities for players to use and create using open source software solutions.	Community Manager: DanishCrypto Committee Members: Majic Snappeh Spacewrangler Joe Noam
Science & Engineering	Explore the science and engineering associated with the elements in the Alien Worlds Metaverse and how it connects to the solar system and innovates on traditional approaches.	Community Manager: Noam Committee Members: Edward Joe Spacewrangler Jungletrekker

Social Games	Create games for players to play in social media and live events.	Community Manager: Jem Committee Members: Darica Noam Spacewrangler Joe Alfred
Social Media	Schedule, post and engage in social media posts for Planet Eyeke and projects associated with Planet Eyeke.	Community Manager: Mr. T Committee Members: Danish Jessika Alfred Umesh
Technologies & Development	Bring together resources to identify, engage and reward developers while identifying priorities for technology development to support the Metaverse and the communities.	Community Manager: Duane Committee Members: Edward Noam Snappeh
Welcoming	Gather and create messaging and resources to welcome new players. Identify play paths for new players. Help new players to have positive and engaging experiences. Recommend Welcome Declarations for communities to connect to Planet Eyeke.	Community Manager: Lysandra Committee Members: DanishCrypto Jessika David Harris Joe

Council Season 1 (Q3 2023)

Plan At Launch

History
Committees have Community Managers. Started by Council Coordinator Lisa Chandler and many community players, the first quarterly Council is proof-of-concept of player engagement in leadership positions of expertise and interest.

Vision
It is anticipated that this community will soon elect its own leaders, identify and support proposals and report to the players the status of their endeavors, including players along the way.

Launch Committees
At launch, the anticipated model accounts for 17 Committees, and up to 4 additional members per committee, the public players supporting each committee and a rewards pool for each committee to distribute.

General rules and processes will be determined by the Council Coordinator and Committees will determine the use of their allocations (in addition to stipends for participation) and can recommend proposals to the Custodians, as well.

Community Managers represent their Committees in regular discussions with each other and Custodians.

Stipend Rewards
Stipends and rewards allocations are planned to be distributed to and from the [Eyeke Council Account](#) with oversight by the Eyeke Council Advisors. Currently that includes the Council Coordinator, Council Advisor and hopefully Michael Yeates (he has been invited to serve on the permissions of the account and asked to consider how we might automate this through smart contracts in the future).

Members agree to share their WAX wallets publicly for ease of distribution of rewards and transparency of leadership.

Discussion
Beginning on June 20, 2023, a [Telegram group with topics was established for the Committees](#). Discussions will take place ongoing (although thought weekly at first) although it may take time to get committee members engaged in the topic discussions. Groups may be more active during times of needed discussion.

Topics
Community managers and Coordinator, as well as committee members and any group member who wants, post topics for discussion.

Launch Trilium Rewards & Allocation Distribution Model

Considering 17 Committees, this is the initial model:

At 2% Distribution	TLM/month	TLM/month Total	TLM/week	Est. # of Monthly Players
Community Managers	17 x 4,000	68,000		17
Committee Members	17 x 4 x 1,000	68,000		Up to 68
Rewards Pools	17 x 2,000	34,000		If avg. 500 TLM rewards, 17 x 4 = 68 And if half not included above, add 34
Council Coordinator	17,000	17,000		Included
Council Advisors	8,000	8,000		1
Custodian Alumni Advisors for the First Year (From Week First Approved)*	5 x 1,000	5,000		Included
TOTAL to Eyeke Council Account		200,000	50,000 TLM/week x 1.1: (.1x per month toward future support) 55,000	Est. 120

This model accounts for supporting 4 weeks per month (or sooner).
*Custodians from the first week approved include: Gnome, Lisa, Duane, Snip and Fury

It is anticipated that questions asked of the Committee members by the Council Coordinator each week will include questions regarding use of the Committee's rewards pool, selection of the future quarter's committee community manager and other information relevant to governance and review and rewarding of the Committee's resources.

Note distribution of allocation will take place over a series of weeks based on when the pools fill.

The process of distribution of rewards will be manual at first and automated subsequently through the Circle technology being developed by Vlad and supported by Planet Eyeke.

Tentative Plans At Inception for Future

At the inception, it is the desire that as more Trilium is unlocked, rewards for individuals involved will also increase. The increase would require an additional proposal at that time.

At that time (and before if needed), it should be considered if additional committees could be added, due to player interest and community needs. If so, that would be added to the model below.

Additionally, increasing the rewards pools and supporting an effort to recruit new creators and support them through a pipeline of planning, scoping and development resulting in sustainable games with rewards pools could continue to increase the number of players benefitting from this platform.

At 10% Distribution	TLM/month	TLM/month Total	TLM/week	Est. # of Monthly Players
Community Managers	17 x 20,000	340,000		17
Committee Members	17 x 4 x 5,000	340,000		Up to 68
Rewards Pools	17 x 10,000	170,000		If avg. 1,000 TLM rewards, 170 x 4 = 680 And if half not included above, add 340
Council Coordinator	85,000	85,000		Included
Council Advisors	40,000	40,000		1
Custodian Alumni Advisors for the First Year (From Week First Approved)*	5 x 5,000	25,000		Included
TOTAL to Eyeke Council Account		1,000,000	250,000 TLM/week x 2 (Until 18 months supported, then 1.1x per month) 500,000	Est. 426

Once operating, based on needs and actual amount released as increased, these numbers might change.

Launch Committees Participating in Support Model

Below find a list of the proposed Committees and the proposed Community Manager for the 1st Quarter.

Community Managers
Should any of the proposed Community Managers not be available, the Community Coordinator will recruit another Community Manager with interest and expertise related to one or more of the topics within the Committee's area of focus. With so many talented players, it is not easy to narrow down who might be best for such a role and have interest at this time of formation. All participants are appreciated.

Committee Members
Community Managers will select the Committee Members for their committee after the week's discussions.

Players
Players who may be interested will be invited, along with a general invitation to players, to join the Eyeke Council Telegram group and engage in discussions in their topics of interest.

Community Manager Registration
Community Managers should send 1 TLM to eyekecouncil with the Memo:

[Committee Name] Committee Community Manager Request

Eyekecouncil will confirm by sending 1 TLM back with the Memo:

[Committee Name] Committee Community Manager Confirmation Q3 2023

Committee Member Registration

Committee members should be identified and accepted in the Telegram group for each Topic. Community Managers will forward in the weekly update who the selected 4 committee members will be, along with their WAX wallet address (which allows TLM and NFTs).

Committee Rewards Allocation

As monthly pools fill up, community and committee members will receive their stipend and then the rewards allowance.

Committee Notes Documents

Weekly notes will be shared by each Committee in the Topics group and in the @planeteyeke Telegram group. The historical notes and status of all allocations will be kept on each Committee's document, linked in the list of Committees below.

Sharing

Committees are encouraged to share links and stories about the projects and status they support in their Topic groups and in the @planeteyeke Telegram group.

Committees

Committee (Link to Notes)	Description	Community Manager & Committee Members
Blockchain	Identify and share the core concepts of blockchain, blockchain games, decentralization and related topics. Welcoming	Gather and create messaging and resources to welcome new players. Identify play paths for new players. Help new players to have positive and engaging experiences. Recommend Welcome Declarations for communities to connect to Planet Eyeke.	Total: 4 Rosmari Lysandra - 15vgq.wam Joe - hdars.wam - @joespacewrangler Extra pwxue.wam

Responsibilities

Committee Community Managers
The original responsibilities included Monday posting and discussion, but to accommodate more people, we are moving from one day to ongoing.

In the Telegram group, there is a topic for each Committee. Each week, the Community Manager will facilitate a discussion about the posted questions including (1) deciding if those will be the questions addressed that week (2) discussing each question (3) adding a poll, if applicable (4) providing a brief summary of the day's discussion and (5) posting the summary in the Topic and in @planeteyeke in Telegram Committee members and non-member players are welcome to engage in the discussions.

Answers will be added to each Committee's Notes document which chronicles the History based on the notes from the Topics group. They are linked on the list of Committees from the Committee Name. Each week, new default suggested Topics will be posted here.

Updated responsibilities include:
- ☐ Adding and addressing relevant discussions in the Topic in @eyekecouncil
- ☐ Recruiting committee members
- ☐ Reporting on discussion progress each week
- ☐ With the Committee, choosing what to do with the Trilium allocation

Committee Members
Committee members chat in Eyeke Council Telegram chat Topics and engage in discussion on how to allocate the Committee's TLM

Advisors
Advisors support Committee members with questions in support of their efforts and of the Coordinator in supporting the program

Trilium Rewards & Allocation History

Incoming to eyekecouncil Account

Anticipated Monthly Total Needed:

At 2% Distribution	TLM/month	TLM/month Total
Community Managers	17 x 4,000	68,000
Committee Members	17 x 4 x 1,000	68,000
Rewards Pools	17 x 2,000	34,000
Council Coordinator	17,000	17,000
Council Advisors	8,000	8,000
Custodian Alumni Advisors for the First Year (From Week First Approved)*	5 x 1,000	5,000
Current Weekly Allocation (4 weeks)		55,000

Outgoing from eyekecouncil Account

Committee Notes

BLOCKCHAIN COMMITTEE

Community Manager: Lysandra (thank you for filling in for Gnome) and Gnome (Appointed)
Committee Members:
Danish Crypto
Alfred
Noam
Gnome
[Committee Distributions](#)

Summary
Identify and share the core concepts of blockchain, blockchain games, decentralization and related topics. Explore player education about blockchain-related concepts and shared values and how Planet Eyeke can facilitate those important play paths.

Onboarding
Noam indicated some things he would like to see as a new developer coming into the game:
https://t.me/eyekecouncil/28/141

Concepts
Gnome has been sharing shorts on YouTube about blockchain concepts, instant finality (which he just finished for Antelope) and the UX chain (one of the Antelope chains he helped to create).
Example: https://t.me/eosship/35

Lysandra has been gathering questions to ask the communities to engage them in philosophical discussions about blockchain concepts.

What does decentralization mean to you, and why is it important in the context of blockchain technology?
- https://medium.com/@VitalikButerin/the-meaning-of-decentralization-a0c92b76a274
- [Linked from Metaverse Community in April: Why is decentralization important to you and the world?](#)
  1. A Central Entity Isn't Needed
  2. Block Producers Host Notes
  3. People Can Act Anonymously
  4. People Can Earn Rewards Through Worker Proposal Systems
  5. Communities Emerge to Support Their Members

How decentralized is Alien Worlds?
- [A discussion ensued about Alien Worlds as a decentralized community of players, comparing w2 games to blockchain.](#)
- Lisa shared data about the intent to decentralize the game:
  - "Dacoco is committed to keeping Alien Worlds and its processes decentralized and making sure the users get as much control as possible."
  - "Our commitment to decentralization is embedded into the very architecture of Alien Worlds" "We want Alien Worlds' DAOs to be able to run themselves and evolve according to the users' will, allowing even further decentralization down the line."

- ○ "the most desirable outcome would be the development of decentralized, publicly accessible gaming offerings built around TLM. These games would ideally use TLM as a resource for in-game abilities (e.g. starships would consume TLM to travel, etc) or as a reward (e.g. completion of a mission provides a TLM reward)."
  - ○ Can Alien Worlds be decentralized if it is currently relying on the WAX blockchain? Yes, because being on chain, it can be moved anywhere.
  - ○ "Alien worlds can be considered an ecosystem though with many components which can be on separate chains"

Do you think that Alien Worlds will be a decentralized game in the wild like Bitcoin?
- 38% (#5) Yes
- 62% (#8) No
- Comments
  - ○ "Yes, but only if Dacoco does not decide to crack down on other projects that somehow connect with Alien Worlds later on. Smart contracts are there, to be interacted with. 😎
    Copyrighted content such as images and audio, yeah, these can be legally protected from others. Blockchain elements, such as smart contract transactions, thats a different story."
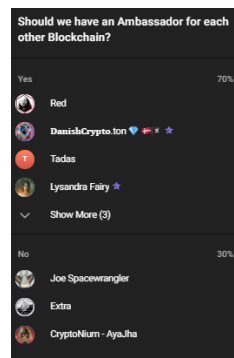

Describe Decentralization...
- Why is privacy important?
- Can we make people not act anonymously?
- How will we stop cheating on the blockchain?
- Why is Blockchain important?
- Why are communities important in Blockchain ecosystem?
- What are tokens?
- Why do communities create tokens?
- What is a wallet?
- What is a blockchain account?
  Please reply and we'll add answers in an upcoming article

Should we have an ambassador for each blockchain?
https://t.me/eyekecouncil/28/1289
- 70% (#7) said Yes
- 30% (#3) said No

🥳 BLOCKCHAIN COMMITTEE TLM ALLOCATION:
6,000 TLM towards the Blockchain Award at the Interplanetary Unconference

COMMUNICATIONS COMMITTEE

Community Manager: Lisa Chandler
Committee Members: Lysandra, Alfred, Omer, Royce
Discussion Members: Majic, Eric, Lysandra, Vlad, Dan Singjoy

Summary
Create and distribute Planet Eyeke publications and communications including newsletter, press releases and training resources such as Gitbook.

Discussion About Establishing Publications and Communications Channels

In several discussions and chats, it was discussed that a good focus for communications would be:
- Planet Eyeke
- Supported Projects
- News from Eyeke Communities

Should Planet Eyeke publish a Medium newsletter?
https://t.me/eyekecouncil/27/209

Audiences & Suggested Social Communications Channels:
Current WAX communities: Medium, Hive, Telegram, Twitter, Discord
New players: Facebook, Instagram

Articles now show up in alienw:
https://alienw.com/community/articles
If Anders links the publication and the article includes "dao" it will show up

The Open Source Committee suggests Hive for reaching more of our communities who understand wallets and blockchain games more than the general public: https://hive.blog/

[Proposal Updates](#)

Should we reward proposal recipients for providing updates?
https://t.me/eyekecouncil/27/362

Fractals are a great way to gather weekly updates in video and see on chain through respect tokens:
https://t.me/eyekecouncil/27/366 and can [result in video clips](#)

Language Translation

A new translators group has been established by Lisa and Omer to post content for translators from many different languages to translate into their languages. Translators Group:
https://t.me/+SJQOaILMHMY2MzVh Translators are welcome to post on their own social media and earn from their posts. In addition, Omer will evaluate how to reward translators.

Quotes

A test of a game to collect quotes was established
https://t.me/eyekecouncil/5/290

Polls

Should Eyeke produce content on each social media platform?

A draft list of publications was created

🥳 COMMUNICATIONS COMMITTEE TLM ALLOCATION:
6,000 TLM towards Eyeke Journalist Royce

COMMUNITIES COMMITTEE

Month 1
Community Manager: Mky
Committee Members: Danish, Joe
Discussion Members:

Summary
Identify communities playing Alien Worlds and together with other committees, connect them to resources on Planet Eyeke.

Default Questions for Week 1
1. Is the summary of your Committee the best it can be at this time, or how should it be changed?
2. What are the most pressing issues to address in your Committee topic, relative to the Metaverse and the needs of the Communities?
3. **Who are the Player Communities that exist in the Alien Worlds Metaverse?**
4. **How do we communicate with Community Managers from player communities?**
5. **What can communities offer their members to do in the Alien Worlds Metaverse?**
6. Who are the 4 other individuals who will be on this Committee during Q3?
7. Will you and if so how will you reward the 2,000 TLM allocated to your Committee to reward via community proposals to your Committee?

DATA COMMITTEE

Month 1
Community Manager: Melissa
Community Members: Noam, Danish, Wizza
Active Discussion Members:

Summary
Identify data needs to support Planet Eyeke projects. Work with the Data Microship to identify methods for counting the number of players and adding new player games and experiences to the number of players leaderboards. Identify data sources for players needing development support and new data needs.

Methodology:
Each committee could collect data and report into a central leaderboard:
https://t.me/eyekecouncil/25/735

Polls:
Should we start a monthly Fractal to collect player data?
https://t.me/eyekecouncil/25/1290
The request was made in the New Inquiries topic of Eden Fractal

DESIGN COMMITTEE

Month 1
Community Manager:
Committee Members:
Discussion Members:

Summary
Provide community art for use in the Alien Worlds Community Metaverse to connect and inspire creators. Identify and support art needs with open source sets of content and art needed to support the launch of projects supported by Planet Eyeke.

DIPLOMACY COMMITTEE

Month 1
Community Manager: Fury .p2bu.wam
Committee Members:
Discussion Members:

Summary
Identify and design diplomatic missions when Custodians identify a need for player to player or interplanetary diplomatic missions.

EVENTS COMMITTEE

Month 1
Community Manager: Snip
Community Members: Decentralised Gardner @dcentralised , River, Mother Theresa
Discussion Members: Eric, Noam

Summary
Identify and create sustainable events and activities for players.

Roles
Discussion of roles needed for the committee:
https://t.me/eyekecouncil/20/167

Tools
Events Using Memos - Anyobservation created a Memo Tracker which Eyeke rewarded. It allows events based on the content of a transaction's memo. For example, if a spaceship flies over a planet and the players send TLM to eyeke.dac, they can be seen as attendees and rewarded with commemorative NFTs. TLM used for transactions can be returned, if desired.
https://t.me/eyekecouncil/20/275

Decentralised Gardener offers a site for events and statistics
https://tool2earn.pages.dev/aw address: efhr.wam
Past support: #351 // 2500 TLM

Event Types

Landowner Events - It was suggested that events around land ratings could be popular:
https://t.me/eyekecouncil/20/295

Center for Governance - Eric reports "We are looking to host the Interplanetary Unconference at the Center for Governance (C4G) Events Hub, and open mic night at the C4G Lisa's Coffee Shop."
https://t.me/eyekecouncil/20/656
https://t.me/eyekecouncil/20/1452

Science-based Events - Noam suggested some science-based events
https://t.me/eyekecouncil/20/665

Polls
Should Eyeke host a month of daily events during August as a vacation theme?
https://t.me/eyekecouncil/20/1304

How much Trilium should Eyeke give away during Vacation Month?
https://t.me/eyekecouncil/20/1359

Should Eyeke support the development of smart contracts for events?
https://t.me/eyekecouncil/20/1396

GAMES COMMITTEE

Month 1
Community Manager:
Committee Members:
Discussion Members:

Summary
Identify games to connect to Alien Worlds and invite them to connect to Planet Eyeke and explore how to meld with the Alien Worlds Metaverse.

GOVERNANCE COMMITTEE

Month 1
Community Manager:
Committee Members:
Discussion Members:

Summary

Identify opportunities for governance experiments and governance models that can be shared with players. Support the Center for Governance on Planet Eyeke.

LORE COMMITTEE

Month 1
Community Manager: David Harris
Committee Members:
Alfred @ecreditcoin z2.di.wam
Red @OrderWorks_Studio redo.gm
Lysandra @LysandraFairy
Joe Spacewrangler @spacewrangler <mark>NEED WALLET</mark>

Discussion Members:

Summary
Identify Planet Eyeke lore and make it available for use and extension by Planet Eyeke players.

History
Red created Lore Wizard imagery
https://t.me/eyekecouncil/15/42

Created Eyeke origin lore
https://t.me/eyekecouncil/15/1639

Looking for location for origin landing
https://t.me/eyekecouncil/15/1649

Considering novel about origin story
https://t.me/eyekecouncil/15/1685

Other historical examples explored
https://t.me/eyekecouncil/15/1706

Gathering Lore
August Vacation Month Event to Gather Eyeke Lore
https://t.me/eyekecouncil/15/1671

MARKETING COMMITTEE

Month 1
Community Manager:
Committee Members:
Discussion Members:

Summary
Create play paths and related messaging in support of Planet Eyeke players on Planet Eyeke website, social media and public outlets. Identify opportunities for sponsors to support Planet Eyeke initiatives and the weekly allocation pool of rewards.

OPEN SOURCE SOFTWARE COMMITTEE

Month 1
Community Manager: Danish Crypto
Committee Members: Noam

Summary
Identify opportunities for players to use and create using open source software solutions.

Open Source Document Options
https://www.fsf.org/campaigns/opendocument/download (from Noam)
https://standardnotes.com/ (from Danish)
https://proton.me/drive (from Danish)

Open Source Zoom Alternative
https://meet.jit.si/ (from Danish)

Open Source Directory / Registry Ideas?
TBD

Galactic Hubs is for open source developers
https://t.me/eyekecouncil/13/1124

Possible Creative Licenses
https://commons.m.wikimedia.org/wiki/Main_Page (from Noam)
https://en.wikipedia.org/wiki/Copyleft (from Noam)

Polls
Should we setup monthly help desk for people to come get help with setting up open source software?
https://t.me/eyekecouncil/13/1291

SCIENCE & ENGINEERING COMMITTEE

Month 1 - DRAFTED TO BE REVIEWED BY NOAM
Community Manager: Noam Tene
Committee Members: TBD
Discussion Members: Stuart, Mother Teresa, Lysandra Fairy, Kevin Rose, Joe Spacewrangler

Committee Summary
Explore the science and engineering associated with the elements in the Alien Worlds Metaverse and how it connects to the solar system and innovates on traditional approaches.

Where is Planet Eyeke?
https://t.me/eyekecouncil/12/52

According to Wikipedia: The planet Eyeke (HD 6434 b) "has a minimum mass about half that of Jupiter. It orbits the star very close, over 2.5 times as close as Mercury orbits the Sun. For this reason it completes one orbit in only 22 days. It does not have a circular orbit, but rather an eccentric one."

Challenges to settling:
There are challenges against settling on the Planet.

How science & engineering committee members will vote on rewards allocations:
https://t.me/eyekecouncil/12/372
https://t.me/eyekecouncil/12/374

Questions asked of the Committee:
https://t.me/eyekecouncil/12/602

What are the most pressing issues to address in your Committee topic, relative to the Metaverse and the needs of the Communities?
- Get enough members to have a meaningful discussion

What would scientists and engineers do when arriving at the Planets?
- Look for more habitable planets or moons orbiting our star.
- Send probes and mapping satellites to explore promising environments and collect information that will support answers to question below.
- Set up a Space Traffic Control system to prevent spacecraft from colliding and creating a Kessler Syndrome around our planet.
- Set up a blockchain market for trading materials

Are the Planets hospitable when we arrive and what are we doing to make them hospitable?
All answers below will be customized based on available material and relative prices derived from the explorer probes.
- Explore moons and figure out where and how to mine life support materials (hydrogen, Oxygen, Carbon, Water, CO_2 and trace elements) 4b. Design spacecraft
- Design starbases, space station and transfer orbits between them.
- Grow crops and livestock to feed our population
- Genetically design better crops and livestock for local conditions
- Breed better crops and livestock

Do we have a magic wand to bend the laws of physics, or are we sticking with Earthly physics as defining and exploring the Planets?
- Our magic wand only works on the Eyeke planet's surface. The rest of the planetary system obeys Earthly physics.

Physics
How can we represent the physics of Eyeke?
Are we able to represent elements with tokens?

Artificial gravity can be used:
https://t.me/eyekecouncil/12/755

Mining
Is there an opportunity to mine asteroids to support Planet Eyeke?
https://t.me/eyekecouncil/12/664

Containing emissions should be considered early on:
https://t.me/eyekecouncil/12/1058

Food
Creating food will be a challenge to address:
https://t.me/eyekecouncil/12/779
Algae, seaweed and dandelions seem recommended

What could be planted:
https://t.me/eyekecouncil/12/1016

Building Materials
Buildings should be created from mining, and if necessary transport through orbital transportation, rather than imported as units:
https://t.me/eyekecouncil/12/873

Transportation
It is possible to use skyhooks and rotating stations for both planetary and interplanetary transportation.
https://t.me/eyekecouncil/12/979

We can demonstrate to explorers the concept of moving materials through orbits by demonstrating in the upcoming circuses:
https://t.me/eyekecouncil/12/904

History
Due to IP agreement language published, it might be best to use terms that are not under copyright:
https://t.me/eyekecouncil/12/925

Lore
Coordination with the Lore Committee is suggested.

Communications

Considerations when creating communications systems were discussed.

SOCIAL GAMES COMMITTEE

Month 1
Community Manager:
Committee Members:
Discussion Members:

Summary
Create games for players to play in social media and live events.

SOCIAL MEDIA COMMITTEE

Month 1
Community Manager:
Committee Members:
Discussion Members:

Summary
Schedule, post and engage in social media posts for Planet Eyeke and projects associated with Planet Eyeke.

TECHNOLOGIES & DEVELOPMENT COMMITTEE

Month 1
Community Manager:
Committee Members:
Discussion Members:

Summary
Bring together resources to identify, engage and reward developers while identifying priorities for technology development to support the Metaverse and the communities.

WELCOMING COMMITTEE

Month One
Joe

Summary
Gather and create messaging and resources to welcome new players. Identify play paths for new players. Help new players to have positive and engaging experiences. Recommend Welcome Declarations for communities to connect to Planet Eyeke.

1.
