

Chloe wojban (window lojban) crafts (2026)

Lojban is a language that is optimal for low characters and window shopping over junk. I personally switched off English for this, but I know not many people are fans of window shopping. Mainly putting so people know what I do if they ask

I only have one rebind, swapping Y and W, this is mainly because my thin resize is Y rather than for easier reach. The rest of the doc will be with rebindless in mind Because of the window shopping part, this doc will also not cover 2x2 searches as I don't search for any 2x2s.

Overworld:

bucket: ba

iron pick: **ta** / se / rs / y

gold/iron ingots: **ta**

bread: ba
