If it took you until your 60's to become RICH, would it still be worth it?

All the money and time spent on courses...

All the late nights note taking...

The early morning business book chapters... NO. It would not still be "worth it."

Amateur entrepreneurs believe if they "don't quit" eventually they'll be a millionaire.

This is a lie. You should quit and find a new path if something isn't working.

I too fell for this lie by reading 10 business books before I realized that my life was still the same.

Imagine if you kept reading and studying at 30 without ever making any REAL money. How sad is that?

To reach your income goals TODAY requires a different style of learning.

You must find the "Synthesizer" to help you filter through the abundance of information.

The challenge is discovering WHO to learn from and WHERE to find them...
