

Hi dears, thank you for downloading my build! i'm very sorry that i can't include all cc in the build, i don't want to encounter any problems with popular cc creators.

So here is a very complete list of creators along with links to the cc's that I always use. If I use something new and it is not included in the constitution, I will be updating this list gradually!

therefore some cc is included in the download, other cc is not. creators with a tou that state not to include cc have been excluded from the download.
