

# Add Disk for Oracle software Installation

## 1. Shutdown Server.

init 0

or

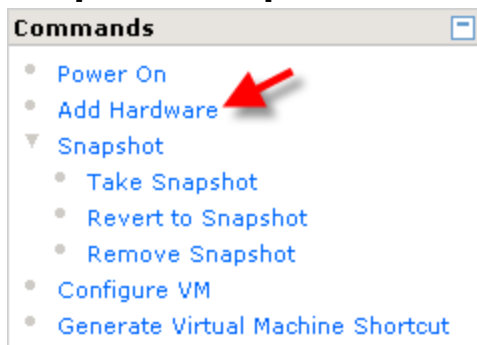

Power off from VMWare Web Access.

## 2. Why Additional Disks are needed?

Mount Point Name	For?
/u01	Oracle and GI software
/u18	Export / Imports and Data Pump
/u99	RMAN Backup and Archivelogs

## 3. Add Disks

1. Highlight the VM Server from VMWare web console.
2. Under Summary tab, on the right side, expand [Commands]
3. Click [Add hardware]

- a. Click on [Hard Disk]
  - b. Click on [Create a New Virtual Disk]
  - c. Use 60 GB for [capacity]  
Later we will divide the 60 G into three partitions. These partition details are as follows:
    - i. 22 GB for /u01
    - ii. 15 GB for /u18
    - iii. 23 GB for /u99
4. Click [Next]
  5. Click [Finish]

## 4. [Take snapshot](#)

## 5. Power on the server from VMWare Web Access page.
