"Israel, the establishment of Israel is based on the erasure of historical Palestine, on the depopulation of Palestinian towns and villages, and the imposing of a new geography in a new urban system, a new transport system, a new meaning, a new set of names, new maps on top of that area. And that is a huge construction project."

"When you grow up in Israel, the entire education system is priming you to become part of a national project of erasure and dispossession. There are things that you simply are not told, and you understand that state ideology requires a certain narrative and requires certain epistemic erasure, meaning the erasure of history, erasure of people, erasure of the truth that you actually see in front of your eyes."

Kick them out or create a situation where it is worth it to them to leave? It's good for Arabs that they leave. The truth of the matter is I'm not thinking about the Arabs. I'm thinking of the future of the Jewish nation. She said they should not help the refugees. We should create a problem that will force Egypt and Turkey and Europe to absorb refugees as they have absorbed from Syria.
