

Gem-Based Draconic Ancestries

Basically what the title says; allow Draconic Bloodline sorcerers to select from the gem dragons introduced in Fizban's Treasury of Dragons when selecting their dragon ancestor. Damage types and expanded spells as below (but feel free to amend the list as you see fit, I just figured I'd give y'all a head start):

Gem Dragon	Damage Type
Amethyst	Force
Crystal	Radiant
Emerald	Psychic
Sapphire	Thunder
Topaz	Necrotic
