Background and Experience
<p><b>Please briefly present the partner organisation (e.g. its type, size, scope of work, areas of specific expertise, specific social context and, if relevant, the quality system used):</b></p> <p>Stichting yEUth is a fully motivated, aspiring, enthusiastic and passionate member of the Dutch and European Civil Society, which wishes to make a difference and create an impact.</p> <p>Stichting yEUth is seated in the beautiful city of Leiden, a city full of young people and students, which is actually the target group of our work: Youth Empowerment. We have the vision, and we are ready for our mission. We are lucky to have already acquired a rich and multifaceted experience from our participation in various youth empowerment ERASMUS+ projects, and through our work we keep enriching it and getting the full benefit out of it so that we can multiply the impact of these projects on Dutch youth life.</p> <p>The members of our Organisation come from different backgrounds, bringing in versatile strengths, interests, experiences and capacities, which combined make a strong team, able to take up all fields of responsibilities associated with project implementation (e.g. organisation &amp; event management, educational content development, team management, dissemination &amp; promotion activities, etc). We met through our participation in Erasmus Projects and discovered that we share the same motivation to impact our societies through youth empowerment, active engagement and multicultural exchange. We pursue our common goals by “transmitting” the Erasmus+ values to as many</p>

youngsters in the Netherlands and Europe as possible.

All the members of our organisation are actively involved in their local community and have extensive experience as participants in various European projects, seminars, student exchanges, summer schools, youth internships, volunteering activities, advocacy actions, etc, at a local and international level.

Through our volunteering experience, our participation in many non-formal education and life-long learning contexts, and our diverse educational background, we have cultivated excellent skills and expertise in team management and project organisation, and a very strong motivation to promote a multicultural and active way of living by involving the youth of Europe in international exchanges and civil society actions.

We try to work efficiently and reliably to meet the following objectives:

- The development and implementation of initiatives and actions that empower youth, women and vulnerable social groups and promote social inclusion and integration.
- The planning, organisation and implementation of non-formal and formal education and training programs
- Skills acquisition and know-how transfer training sessions and projects, as well as the development of think tanks on human rights and sustainable development
- The development of professional and social networking of civil society organisations and the expansion of their knowledge base.
- The preparation of proposals and the implementation /management of EU and other projects related to the general objectives of the organisation.
- Participation in research programs, the promotion of research and innovation and the utilisation of experiences, good practices and synergies with bodies having related objectives.
- Planning and implementation of projects relating to the organisation of cultural, environmental, sociopolitical and socioeconomic events aiming at civic participation and promotion of democracy at all levels of everyday life.
- Planning interventions to counteract unemployment and social exclusion, boost employment, and promote civil society's contribution to the universal respect of human rights, peace and sustainable development

### What are the activities and experiences of the organisation in youth work?

We are committed to empowering young people through non-formal education, intercultural dialogue, and active participation in society. Alongside our international Erasmus+ projects, we are actively engaged in our local community. We implement events and activities in cooperation with youth associations and student organisations locally, ensuring that young people in our city have opportunities to learn, connect, and take initiative. Our work is supported by three dedicated volunteering groups who strengthen our capacity in specific areas: one team focuses on dissemination and outreach, another on proposal writing and project development, and a third on facilitation and implementation of workshops and exchanges. We combine local impact with international experience, supporting youth and youth workers in developing skills, resilience, and active citizenship.
