Shop Lights

Lighting for garage is quite essential as it assists your car repair work, and improve the safety. No matter for home or commercial workshop, LED is always the best option when it comes to lighting up the indoor or the semi-outdoor ceiling. The major advantage is to reduce the energy bill and extend the usage time up to 8 times after replacing the fluorescent tubes. Some of the products even have linkable function which is easier to install. This page recommends you the 13 best LED lights for garage ceiling.

1. Hyperikon 4ft LED Shop Light – Best LED Garage Lights

This is a lighting fixture having long life span and high energy efficiency. The Hyperikon comes with a double fixture and is cheaper and brighter than the typical fluorescent light. Alongside the package, it comes with a manual that allows for easy guidance for a safe install. It can be used in basements, garages, utility rooms and workshops. This lighting saves you about 62 per cent of money spent on electricity bills. It is a one-time California best seller among its peers. The

Hyperikon's LED light comes with a 5-year unlimited warranty. You can always contact its seller for a replacement anytime.

Comparison to Other Products
It is cheaper than its peers, energy and money-saving with the ability to do better than two fluorescent bulbs. This lighting can go for six hours a day without a flicker for a period of 21 years due its 45000 hour lifetime. It comes with a sixtyfive inch cord for easy and adjustable installs. It has a steel fixture that guarantees its durability across its lifetime.

It also comes with linkable function which allows the users to connect 4 sets of light tubes in series.

Customer Reviews
• A customer recommends its good lighting but is not impressed by its packaging. He was also impressed by its color.

• Its two short steel mounting cables impressed another customer, the lightness in weight and ease of install. He also tried flash mounting it and could not believe a suspended lighting is also capable of a flush mount. The integrated switch and plug were in good shape.

• The reviewer could not shy from saying the packaging was not good and that on shipping most of the shades got damaged.

• A buyer also tried the Hyperikon light and was happy with their light efficiency and but is unhappy with their inconsistency in packaging comes with a missing item could be a chain or cord anytime he buys them.

2. Barrina LED T5 Integrated Single Fixture – Best T5 Lighting System for Garage
This is a formidable lighting option for your garage. The Barrina LED T5 come is a package of six made up of six small connectors, six installation accessories, six LED integrated fixtures, five 7.8-inch connecting cords and 59-inch six power cords with switches.

This product has a lifespan of 50000 hours, a plug and play system, a low power consumption and thermal output, and a 100 to 110 lumens output per watt. This LED garage light can be used in hotels, plazas, subways, terminal buildings, hospitals and offices to provide lighting. It is a healthy, bright and cheap source of light.

Comparison of Other Products

The Barrina LED is a brighter and cheaper source of Lumen due to its capacity to its 2200 lumens and the lower 20 watts consumption that saves you about 65 per cent of money spent on energy bills. All in six-pack can work at the same time with the help of the connector cords. In the case the Barrina LED T5 Fixture malfunctions, it can be replaced as a result of its 3-year warranty to all its customers.

The Barrina LED has been tried by a number of people. They have a number of things to talk about the product as follows:

• A customer says it can make a big room bright, calls it easy to install as long as the customer has light bulb fixtures and a socket.

• Another customer had once bought the 6500k and the 4000k and was trying to compare them. He describes the 6500K as a harsher and brighter light than the 4000K light which was less harsh despite the fact that his ceiling was short.

• Another buyer describes the Barrina LED light as having the best output but slow to light after switch on.

3. Sunco 40W LED Utility Shop Light (4000lm) – Best Ceiling Lights for Garage
The Sunco Lighting is a high standard light bulb. Many electricians and contractors prefer this type of light. Sunco lighting respects all the quality control requirements of lighting. It can last for a maximum of 50,000 hours. It is UV and mercury free making it safe to man and environment. With this lighting device, you should not be afraid or scared of its chances of dimming. Once bought, it comes with an instructional manual to allow for easy connection for use.

It has a 5-inch plug and play cord, a 19.4 full switch and can be mounted or suspended depending on usage. You can also connect not more than four LED Utility lights.

Comparison of Other Lighting Products
It produces 5000K natural light and has a 4000 lumens output giving clients a better lighting experience. It is simple to plug in due to its plug and play cords mechanism and the availability of a customer guiding manual. It is small in appearance due to its white finish and frosted lens making it good for your small garage utility room, porch and patio. It is light efficient and reduces dangerous emissions that usually other lights produce.

It is one of the most prominent utility lightings. Different customers have different opinions about the Sunco Lighting.

• A photographer describes as bright, daisy chained and can become in threes giving your room a good look. On the other side, he is not quite impressed by the way they can only light independently.

• A customer says that the garage lighting kept him safe from ghost attacks as he did his laundry in the night. With just two of them, he managed to light his garage for night duties.

• Another buyer believes they have replaced the old fluorescent bulbs. He also describes them as “snap to install”

• A reviewer was not happy one of the bulbs stopped functioning after a number of months.

4. Hykolity 4FT 36W LED Shop Light with cord – Best Garage Lighting Fixture
Hykolity Utility LED light is a long life, light efficient, energy saving light. These lights are designed to meet the needs of your pocket. They are a good option for use in utility rooms like garages, workshops and garages. It has a lifespan of 50,000 hours, an integrated inbuilt switch, and an output of 3600 lumens saving around 60 per cent in electricity bills. Residential and commercial can use the Hykolity LED lights. It is a safe source of light that is free of radical emissions that can easily affect consumers and the environment. It also lights uniformly. These lamps have wide applications and can be mounted or suspended depending on the use.

Compared with peers in its category, this kind of light is the cheapest at about 24. 99 dollars. The Hykolity’s product is the most advanced for use in utility rooms. It is easy to mount and has a long life, even with its brightness; these light bulbs spread light uniformly across a room irrespective of the color of its bulb. It is easy to install due to its corded electric and minimalistic look because of its powder finish. In addition, this product also comes with a 5-year warranty.

• A customer bought the Hykolity light bought one bulb and tried it, it functions greatly but on trying another one the light went.

• A reviewer bought the Hykolity’s product and could not believe four units could fit a box on getting them out and trying them was amazed at using them. He believes there are inexpensive and practical.

• Another buyer believes these light are a great project product. Using them in his garage was amazing due to their brightness, lightness and cheapness.

• A customer believes they are good light bulbs that need modifications to allow for more installation options besides hanging and mounting.

5. BBOUNDER LED Shop Lights for Garage 36W (3600 Lumens) – Best Shop Lighting System
These lights are designed to meet the needs of your basement workbench. It has an output of 3600 lumens, a 64-watt fluorescent, double fixtures. Bbounder LED lights have a lifespan of 50,000 hours. They can be suspended or flush mounted depending on use. They are an easy install, you only need hanging chains, screws and hocks. These lights are certified by the quality controller, ETL and are safe and efficient to operate and use. They can be installed in both small rooms such as utilities or garages or bigger rooms, in this case, could be warehouses and equipment rooms.

This 4ft LED light is a focus light. Focusing it on your bench allows you to acquire the accuracy required for a given creation. Its 3600 lumens output enables to shine brightly in any room it will be installed and can be used in most if not all work areas; big or small. It also has customer satisfaction warranty of 5 years for any issues that may arise in this period from installs to maintenance. Due to its brightness, avoid direct glance as it lights to prevent eye damage.

• A food marketing company highly rated the Bbounder LED lights and could not even compare it to other lighting options she has used before.

• The company also adds the bulbs are easy to install and is thinking of buying more.

• A buyer is pleased with its price and light efficiency. He also adds that the Bbounder lights are light and easy to hang, has a good on and off switch cord.

• A client says the light worked better than expected. They were bright and clear and can be recommended for anyone.

6. Amico Linkable LED Utility Shop Lights – Best Energy Saving Garage Lighting
The Amico Linkable LED Utility lights are created with the intent of reducing their weight and bulk even as they are light efficient. This lighting has an output of 4000 lumens. Besides being light, this package is easy to install due to their double integrated weight fixture. The Amico Linkable light bulb is viable and healthy for human use due to the fact that they reduce dangerous emissions prominent in other sources of light. With this light, you can be able to brighten your garage or work area. This light has a long lifespan despite being a safe and healthy source of light.

The Amico stands out as a result of its important features. The Amico Linkable LED is the bright to the extent that a single bulb can light a single 10 square meter room. This lighting does not flicker, is free of Ultra Violet emissions and Mercury. Amico replaces the past fluorescent bulb as it can be installed on your ceiling. You will be amazed that Amico light bulbs can be interconnected to a capacity of twelve. These LED lights are easy to switch on and off since they possess the daisy chain. You will also be able to save a lot of money spent on electricity due to its ability to save energy.

Comparison
• A customer bought the Amico LED lights. The lights are bright and light to carry whenever you are installing them.

• Another buyer is amazed by how easy the Amico LED lights can be installed. He also attests that the lights are light efficient.

• The lights did not fully go off after being turned off.

• The lights work great and rates it highly and positively.

7. LEONLITE Garage Workshop Lights – Best LED Lighting Fixture for Garage Ceiling
It is a simple lighting system that is maintenance free and allows for functioning in both commercial and residential houses. They are a good replacement for the old fluorescent bulbs. These LEDs are light efficient. They have a longer lifespan and energy saving. The lights can be used in most if not all places.

It can be installed through flash and suspended mounting, an output of 4800 lumens and can be installed at anywhere between 7 and 16 feet. Besides it comes with items in the 12 pack, it has manual to enable easy and safe installs.

LeonLite's product is a light efficient device that satisfies the needs of large and light requiring spaces. It also comes with a sales guarantee of 24 everyday service that includes free maintenance. The 50,000 hours service life gives it a non-flickering advantage over other lighting devices. This lighting can light for a straight six hours a day without a flicker. They also come with an impact resistant glass; cannot be damaged if they fall during an installing exercise.

Being able to adjust your lights at different heights is whatever one needs. This package comes with a mounting cable that allows it to be adjusted from 7 to 14 feet an still produce the right amount of lighting.

• A customer was impressed by this product, states it is easy to install, and has a good coverage.

• Another customer refers says he could not believe these lights as cheaper even when they came with sets of four. He also adds their brightness beats that of the old fluorescent bulbs.

• However, a customer was not happy with the packaging of the LED lights. He is however happy with its lighting efficiency and believes if they are packaged well (not slim) box he can still buy them.

8. Brightech LightPRO LED Shop Light – Best Commercial Grade Garage Lights
This is the innovation that just overtook the use of the old and light inefficient fluorescent bulbs. Brightech offers cool white ultra-bright beams for use in garages, work areas, utility rooms, workstations and equipment rooms. It has an output of 40 watts. They are also light in weight and will save you money spent on electricity bills. They have a lifespan of 50 000 hours equivalent to 20 years of usage. This LED is an instrument of precision. With this light bulb, you can be able to obtain a sharper focus of an item you are working on in your workstation.
The Brightech's LED light does not flicker when in use. With a 50 thousand hours lifespan, this lights can stay for up to twenty years. Besides having an output of 40 watts this light can do better than the normal light fluorescent bulb.

It comes with a tools kit. The toolkits are made up of two suspension cables. These suspension cables can be adjusted whenever you will need to change the height at which the light reaches and appear. This light is also good in the case one will need warmth or calmness during a warm or cool weather. The company has a warranty of three years in case of any malfunction or needs be.

• A customer says the use of the Britech LED lights was a good addition to his garage experience. The lights transformed his dungeon to a good workshop.

• Another buyer was pleased by the bulbs as they were heat and light efficient. She thinks of replacing the old fluorescent lighting by these new ones to allow for a light and warmth.

9. LEONLITE4ft 40W Double Integrated LED Ceiling Fixture – Best Linkable Workshop Lighting

This product is created for large space lighting. This is a lighting of convenience. The Leonlite LED light just requires the room to have an electrical outlet also known as a socket. Connecting device to the outlets will immediately provide you with the light you require.

This Leonlite's product has an output of 4100 lumens, a plug and play mechanism, 4000 kilowatts cool white that ensure a good environment, a long lifespan. Leonlite is also mercury and UV free that allows for use without causing harm.

For the easy spread of light across the room, this product comes with mounting suspenders to allow for it to be fixed on the ceiling or roof. This light does not flicker, pause or produce a humming sound whenever it is on. It can be used in other areas, these areas as expected are bigger than the garages and workstation we are used to. Leonlite can be used in large halls, warehouses, factories, retails and main market stores.

This workshop lights stands out as a large space lighter. It is certified for use because it is free of Mercury and radiations.

It requires less action to put it on. With an outlet, in less than thirty seconds one will have filled a room with light.

It can also work while interconnected with others. By attaching the lights and having enough power outlets, a given room can be filled with light from more than one LED light source and an on and off pull cord.

• The buyer was happy with this product because it can light the workshop perfectly and that it is easy to install.

• However, a customer found that one LED continued to light after shut off. Suggested something should be done about it.

10. Lithonia LED Shop Light with Toggle Switch
This is a good lighting device created mainly for the working area or the garage. Lithonia LED light is quite affordable and will the amount of brightness you require. This source of light comes with mountain chains that allow for its suspension to form the top of your garage as you continue to work. It has a lifespan of 35,000 hours, an output of 3200 lumens. This LED light also allows for plugs into outlet in case you need to light them.

Created specifically work areas, garages, and utility rooms, the Lithonia LED light is cheap in price. Together with their high light efficiency, these LED lights have a long lifespan. It has provisions for the S-hook and the mounting chains for suspension whenever you wish to use them. It is certified for use by various lighting appliance quality controllers in Europe.

• A number of clients have used the Lithonia LED lights. They have to say about it. Some showing a lot of delight it has brought to their lives, others showing a different feeling about garage light.

• A client added a situation to the use of this product. He believes they can be used in damp areas. He also attests to the structure and the light efficiency of these LED lights.

• A customer just wanted to try this LED light and therefore bought one. With a good structure and brightness, he downloads an app to check its ability only to find out is more powerful than it appeared. The light produced 50 times the bulb used before. Even without the mounting chains, it comes with the same bulb was mounted on the ceiling. He is planning on buying three more to replace use on the work area.

• A customer says this is exactly the kind of light he has been looking for. The customer was impressed with its brightness, the possession on mounting hooks and lightness of the LED light.

11. OOOLED 48W Linkable LED Wraparound Flushmount Light
The OOOLED garage light is a flush mount lighting. It is one of the easy install LED lights. This lighting is easy to maintain and can be used in commercial and residential buildings. This light is a formidable replacement of the old fluorescent light providing a cost-efficient lighting due to its output of 4000 lumens. This lighting stands out for its uniform colors and light distribution. Due to its high uses at home people have decided to install them under their cabinets, in their hallways, stairways, closets and garages. Similarly, this product has a lifespan of 50,000 hours and can help save 65 per cent of money spent on electric bills.

You do not replace the region of mounting this LED light. It is made in the way it covers the mount regions. It is light efficient and certified by the quality controller ETL for safe use and performance. This light comes with a five-year warranty that enables for easy maintenance in case it malfunctions. It is an instant turn on and is specifically designed with a diffuser that prevents you from direct light that can damage your eye as a result of its brightness.

• A customer refers to them as excellent lights. He loves their bright and white light. He, however, complains of light leakages at the ends of the lighting that allows for light to escape.

• A client, homeschool mom, calls it an easy install and a good replacement to the old fluorescent lights. She recommends that the lighting be fitted with a 10 feet extension cord and is even thinking of buying.

• Another reviewer was impressed with the quality of brightness, its 4 pack and design calling it a light of convenience. He used them on his race car, mounting them himself and advises users to mind the led strips to avoid damage that can affect their mounting on a ceiling or wall.

12. FrenchMay Linkable LED Utility Shop Light – Best Pull Chain Mounting Garage Lighting Fixture

The FrenchMay's lights last for about 23 years. It allows you to light up your garage at a cheaper price. It is light efficient and healthier to use. With its double integrate fixture your current ceiling can be easily replaced by this company. Made with ultra-lightweight technology, it is a light and easy install. It can be used in game rooms, utility rooms, workshops and basements. It can be hanged or flush mounted depending on use and purpose. It has a long lifespan, an instant turn-on and is free of flicker.

The LED light produces 5000K natural light and has a brightness that heats 4800 lumens. It has a guaranteed durability of 22.8 years doing an average of three hours a day. It comes with a five-year warranty in case it malfunctions and needs replacement. The Frenchmay is attached with a daisy chain for its suspension and has a good white finish that gives a nice look on mounting.

• A customer claimed that they are easy to install, and giving out nice & bright white light.

• Another buyer thought of buying two only to realize one does the job perfectly. He believes they are aa good replacement of the old fluorescent bulbs.

13. Hyperikon's LED Slim Flood Lights

These are high performing energy saving and long-lasting garage bulbs. It is the latest technology in solid-state led lights. With its lighting, you can notice the good feeling it brings to a house. You can easily mount it on previously used fluorescent fixtures. You will be surprised that the Hyperikon flood light is weatherproof, a lifespan of 45,000 hours and saves up to 80 per cent of money spent on electric bills.

This Hyperikon LED light will light the hidden areas of your workspace. It uses a minimum of 80 lumens per watt. These lights are maintenance free and can up to 20 years without maintenance. They can be used in adverse weathers due their stainless steel material and guarantee optimal functioning in those areas. The floodlights have a five-year warranty due to the customer service and satisfaction its producers assure its customers.

Besides, it has an unconventional design people are not used to but functions properly even with the lack of heat sinks that usually direct light to areas of focus. With it you are guaranteed there is not heating effect on the fixtures.

• A customer could not believe that even after the lights are on for a while it still does not get hot.

• Another buyer believes these are a great work site source of light. They actually work better than light specifically create for job sites for example halogen lights.

• Another customer was very impressed by its capabilities, the free from heating effect, the easy to mount technology, the weather resistance and ability to be used in various weather conditions but suggested an increase in its wire or cord length to enable for easy mounting in cases the mounting area requires longer wire or to for easy adjustments if need be.

• A customer admired its abilities but believed its external can be made safer due to the reason LED produce a lot of light by just releasing a lesser number of watts than the typical fluorescent lighting.
