

## S6: I am learning to subtract 3 digit numbers by jumping along the number line

(Stage E6 - can't go through tens and ones yet)

- Stage 6 can go through tens and ones)

Use the number line below the problem to jump BACK in order to solve the problem. The lines aren't drawn to scale.

$$564 - 235 =$$

Answer = \_\_\_\_\_ 564

$$405 - 231 =$$

Answer = \_\_\_\_\_ 405

$$302 - 115 =$$

Answer = \_\_\_\_\_ 302

$$822 - 674 =$$

Answer = \_\_\_\_\_ 822

Using a ruler create your own number lines and solve the equations below: Use the dash to start your line

$$504 - 289 =$$

-

$$439 - 209 =$$

-

$$763 - 299 =$$

-

$$621 - 154 =$$
