

Name:

The Poetry Project Proposal

Poem title and author:

What technical aspects of your poem do you wish to emphasize through your project?

What larger meanings of your poem do you wish to explore through your project? In other words, what do you want your classmates to understand about your poem through your project?

How do you envision the final version of your poetry project? In its ideal form, what might it look like? You don't need to decide on a single project here (unless you're ready to do so); just use this space to brainstorm:

How will your project express your understanding of the poem? Explain the connection you've created.
