

Privacy Policy for Synapse kiosk
Effective date: February 12, 2026

Synapse kiosk is an iPad event photo kiosk application.

What the app does

- Displays event photos.
- Allows optional photo actions such as print requests and SMS share requests when connected to an event server.
- Uses the device camera only to scan a server QR code for setup.

Data handling

- No user account is required.
- In demo mode, the app can run with bundled photos and no external server.
- If SMS sharing is used, a phone number entered by the user may be sent to the configured event server to complete the request.
- Photo identifiers/selection data may be sent to the configured event server for gallery/print/share actions.
- Synapse kiosk does not use third-party advertising SDKs and does not sell personal data.

Storage and retention

- Data processing and retention for event operations are controlled by the event organizer/server operator.
- The app itself does not maintain a separate user account database.

Children

- The app is not directed to children under 13.
