

University of Toronto BODY SUBSTANCE EXPOSURE

Source Person Kit Instructions for Mount Sinai ED

The following instructions are to be provided to the ED staff.

1. **A Post-exposure “source” consent** is included in the Exposure package presented by the source person. Please ensure the consent is signed and obtained before any blood can be drawn, then placed in the person’s medical record. This is proof that informed consent was obtained and so should remain in the person’s medical record.
2. **Order test** as per consent form
 - Hepatitis B surface antigen
 - Hepatitis C antibody
 - HIV antibody/antigen combo
1. **Microbial Immunology Requisition:**

Prepare and complete requisition and Addressograph label. Requisition must accompany sample to the Department of Microbiology.
3. Draw **one red or gold top** tube of blood (not included in kit), labelled with laboratory test label. Place sample with requisition in appropriate biohazard bag, and forward to microbiology.
