Class Goals

This red tool training class in the main room at Makersmiths Leesburg, Makersmiths members will learn how to use the Roland LEF2-200 UV Printer and print on a 4x4 ceramic coaster.

You are welcome to bring an image you would like on your coaster! Just make sure it's on a portable USB drive!

Key Takeaways

After this class, you will be authorized to use the UV Printer independently.

Class Structure

You will learn how to:

- Turn on and setup the machine
- Setup your media
- Setup your artwork in a jig template
- Prepare your work for printing
- Add your file to the print queue
- Print, monitor, and emergency stops
- Removal and cleanup
- Shut down
