Our insurance commission software was made for *all* insurance businesses that calculate and pay commissions.

- Reclaim valuable hours of your day to focus on strategic accounting, not tedious data management
- Process new and recurring commissions quicker and stay up-to-date with the ever-changing rates and policies of a growing insurance company
- Create happier agents by reducing errors in manual calculations, commission and chargeback tracking, while speeding up turnaround times
- Limit reliance on IT to use the systems you currently have in place

Take control of your balances and processes

the insurance commission hub

Comissio is your unified hub for all of your agents plus all of the carriers they are licensed to sell. This single engine powers calculations, payouts, and reporting for new and recurring commissions, adjustments, and chargebacks.

image/gif

Track how each agent gets paid and when

flexible pay codes & schedules

Automate when agents are paid by weekly, monthly, and annual pay schedules with options to customize pay codes for insurance commissions paid as earned or in advance.

Save time by batching your runs

multi-carrier processing

You've got options. In any run, you can process commissions for a single carrier, multiple carriers, new business, recurring business, or all of the above at once. You can also reconcile individual carriers.

Track how each agent gets paid and when
flexible pay codes & schedules

Automate when agents are paid by monthly, quarterly, and annual pay schedules with options to customize pay codes for insurance commissions paid as earned or in advance.

Easily report on anomalies in commission cycles
adjustments & chargebacks

Display total adjustments and chargebacks for each commission cycle, even if adjustments are applied after a run or to agents without activity in that cycle.

image/gif

image/gif

Simplify hierarchy management
custom setting for agent detail

Set default and alternative hierarchies by agent for variations in commission structures from different carriers, advisors, and their supervisors.

Offload manual, erroneous performance tracking

reporting and analytics

Use your master dashboard for monitoring your most important KPIs for the year at a glance and built-in tracking and recovery for commission advances specifically for the insurance sales space.

Insurance Commission Software FAQs [Accordion]

How hard is it to get set up?	▼
The Comissio quick-start implementation provides import functionality that allows you to bulk import commission distributions, agent pay codes, pay schedules, contracts, carriers, plan rates, appointments, policies, transactions, and more (with limited to no IT involvement required).	
Can Comissio handle the volume of commissions for many agents?	▼
Absolutely. Comissio has been put to the test for insurance companies with a handful of agents up to hundreds of agents.	
Is there a search function for policies, contracts, agents, and organizations?	▼
Yes! ...	
Can Comissio electronically pay commissions directly from the tool?	▼
Yes! Out of the box, Comissio allows you to generate NACHA files to transfer funds, provided agents have a checking or savings account on file to receive the funds.	
Do I have to make a special request/pay extra to set up contract-level admin	▼

fees?
This is an out-of-the-box feature on the contract level but not required for all contracts.
Is there an easy way to manage levels for overrides and commission sharing? ▼
Yes! Control over levels for overrides and commission sharing for policy sales is an out-of-the-box feature.
What type of rounding does Comissio use? ▼
For added accuracy (and consistency with other calculations your accounting team uses) Comissio uses Banker's Rounding, where the value is rounded to the nearest digit divisible by two.
Is there an easy way to see key performance indicators at a glance? ▼
Yes! The Comissio Dashboard highlights the premium collected for the entire year, new vs renewal policies, agents persistency ratio, and chargebacks for any policies.
