

Adobe Express Interface Overview

Adobe Express Interface Overview

Adobe Express Icon and +

Once you've successfully signed on, the Adobe Express homepage displays an Adobe Express icon and a blue circle with a + (plus) symbol in the top-left.

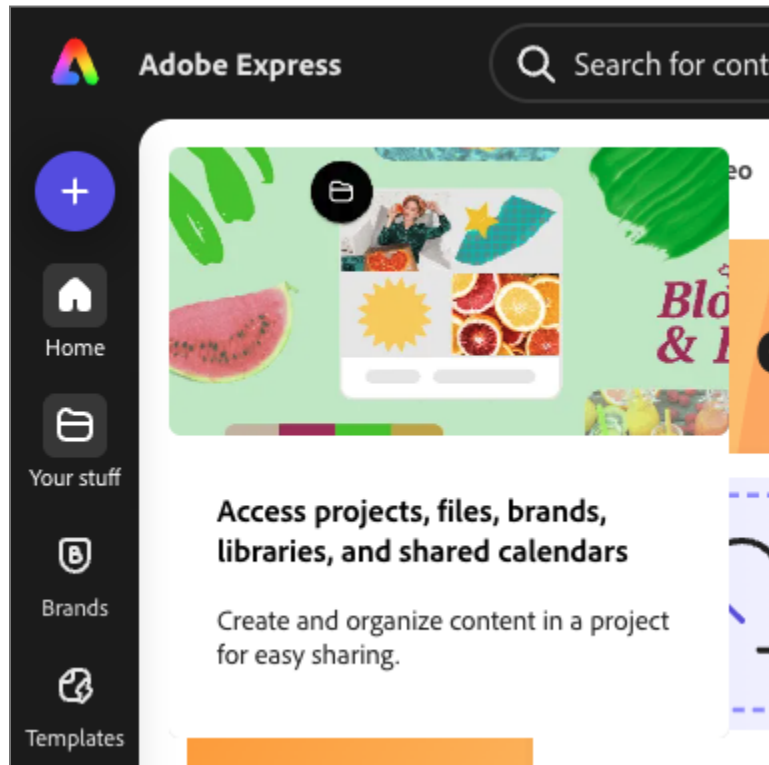

Click the + and select a project to create from scratch or a template.

Click the Adobe Express icon to return to the homepage at any time.

Your Stuff

All projects you create are stored in the **Your stuff** folder, located in the left-side menu of the homepage—below the + button. Express automatically saves everything, so there's no need to click "save" as you create.

Remixable Templates

You may be asked to start a project from a **remixable template**. Most remixable templates are accessed through a link. Click the link ([Remixable Template Example](#)) to open the template in Adobe Express. Then click either **Remix this** (or **Remix** depending on the template) from the top-right corner. This creates and saves a copy of the template directly in **Your stuff**. You can now edit every element without changing the original template.
