

*(Translated from French)*

*To the SP Group Executive. I, Martin Pilote (Physical Sciences), hereby nominate myself as a member of the Quebec and Nunavut Region for election to the Applied Science and Patent Examination (SP) Group Executive. I have been an employee of Environment and Climate Change Canada, within the Meteorological Service and the Science and Technology Branch, for over 25 years. Since 2022, I've been an active member of the Professional Institute of the Public Service of Canada (PIPSC), as a union delegate, member of the national committee on professional recognition and credentials, member of the regional committee on the prevention of harassment and violence in the workplace, member of the local and regional union-management advisory committee and union representative on the local health and safety committee. The experience gained over the years within the Public Service of Canada and PIPSC and the sharing of this experience would be a significant asset to the SP Group Executive.*
