Letter from the Publisher

Okay. I get one page to do this. This thing is foretold. We know what's going to happen. What do you say? Time is running out. Judicious 90. We are at work. 541 a.m. What's going to happen is there will be two bells. The first is our 2-minute warning. It's nice that Carl is here. He was the right man for the job. Thank you Carl. Should we pack that paragraph or those lines into a paragraph or leave them? Can we erase? I mean I understand this is the end but it's technically 11 minutes. Do we edit? can we edit? Look. Last line. Put those four sentences and these into one block. Please. She said, "do what you want."

So these are two hail Marys? Shut the fuck up! This is serious. sorry. Two hail Marys. Cool

It's bullshit just sitting here. It's 5:51. Plan for America. That's it. You are right. Close the borders. We absolutely agree. Good luck. We have planted an interesting garden where we mix all the races together and give them all the resources in the world to see what they can do with it. They've been killing us for our gift forever. That's it. We put the toys away and either 50 years incubation or you join the club. For Russia, всё уже. Всё, иди домой. Это хватит. У вас был много испортилось всё. Больше нет у нас. Иди! Иди отсюда! Пожалуйста. Пожалуйста уже. Это хватит уже. Сколько нам должен платить уже? Сuka!!

Right. There's the first bell. We hope you have enjoyed us whoever you are. It's we. Believe it or not, it's a group effort for good or for bad. We get what we get and we get to eat what we get to eat. And if the food is fucked up because our neighbors never stop poisoning us, isn't it wonderful that mutation is possible? That's what the Empire told us. We will just mutate to something new and there will be new markets to explore. In their infinite wisdom, they have given us what we have and gosh, let's just suck a dick for our lives. I'm sorry if that's really bad. That was just something that popped into my head while we were hanging out with Greta and talking about the worst things we could possibly say but then again it is kind of like sucking a bag of dicks every day of your life. Don't lose sight. I guess I'm rambling. I guess I have a right to be rambling. One suggestion. When the next bell rings and you're just going to tell us what you see, do it Torah. What the fuck. And to all the girls I've loved before who have traveled in and out my door.

I've got phlegm in my mouth and a mech and a tech at 5:57am God love the world well the thing is they told us what was happening and now I am standing at the window and looking out to see really not much anything because it's dark We are here at 52° north latitude It's very cold not very cold You can still wander outside with your genitals hanging out just for the refreshment of it and it's not horrible no one's going to die from this okay I get it I can see now wow that is really a lot of missiles I'm impressed I mean it can't just be for us there's no way this is only for us we knew it was coming for us they were nice enough to tell us so that we could prepare any sorts of ceremonies we wished to have but we didn't know it was going to be that many missiles or oh fuck this is going to hurt or maybe not really maybe it's not going to hurt at all maybe we will never feel a thing hey Carl thank you bro seriously thank you for this there is no fucking way we could have done this without you You are a gift to the planet Earth just as we all thought we were You were just better at it thank you sir for your service to the community la di da la di da пока пока

Want to do something new? Make a list.

1. Write your ideas down and make them clean
2. Make a plan of action to make things better
3. Follow the plan but be willing to improvise
4. Finish what you start and check your work
5. Remain humble with both praise and criticism

God is nature and nature is God
