PROFESSIONAL EXPERIENCE

FREELANCE INFORMATION TECHNOLOGY CONSULTANT

Remote

Information Systems Design & Management

DECEMBER 2017 - PRESENT

- Working with organizational leaders and start-up founders to design and implement technology solutions based on business and customer needs.
- Conducting research to inform solution design, including website creation, application prototyping, and near real-time dashboard design.
- Leveraging organizational requirements and business logic to create data-driven solutions to track, visualize, and monitor benefits and risks.

SPACE FOR HUMANITY

DENVER, CO

Non-Profit Director of Technology

FEBRUARY 2019 - March 2020

Technical Advisor

March 2020 - June 2023

- Led configuration and maintenance of all technology platforms.
- Developed the organization's web presence and customized tools for project management, partnership tracking, and grant tracking.
- Performed implementation of research-driven technology solutions, emphasizing data-driven decision making and impact measurement.

U.S. BANK

MINNEAPOLIS, MN

Information Security Data Engineer

February 2016 - August 2017

- Managed an internal data loss prevention (DLP) and risk analysis system.
- Designed and maintained dashboard visualizations informed by business requirements and data visualization best practices.
- Developed ETL solutions for data analysis and correlation, with outputs in PowerBI and Tableau.
- Emphasized data integrity and clear communication of complex information.

Information Security Data Strategy and Innovation Lead

January 2015 - February 2016

- Managed a departmental project to outline an updated information security control framework based on the NIST 800-53 and Cyber Security Framework policies.
- Managed relationships with business line managers to identify, assign, and track security controls relevant to functions assumed by the team.

Information Security Development and Operations Engineer

October 2013 - January 2015

- Assisted in the engineering and administration of an Oracle identity and access management (IAM) platform.
- Managed ticket queue for the IAM team to remediate account provisioning, identity entitlement, and general access issues.
- Developed automation processes for data processing, analysis, and document generation.
