

The slope of the following relations is 2.

a)  $y = 2x + 1$  b)

| $x_1$ |  $y_1$ |
|-------|------------------------------------------------------------------------------------------|
| 2     | -8                                                                                       |
| 4     | -6                                                                                       |
| 6     | -4                                                                                       |
| 8     | -2                                                                                       |

c)
