Favorite Remix Methods:

1. Minor-toned Method (Since i worked hard just to do the correct chords for that method.

Note.1: This is the minor-toned chord pitch method(Fig.1). You need to move the center DCD Pattern (F#, E, F#) to minor case (F, D#, F). Do Not move the center G line. This is the results. (F, G, D#, F,)(Fig. 2).
