Meta: We tried Snov.io for 7 days, and here's an unbiased Snov.io review based on user reviews with detailed pros and cons and a better alternative for you!

We Read 50+ Snov.io Reviews, and Here's What We Found!

TL;DR:

What is Snov.io: Snov.io is a sales automation platform for cold email marketing and outreach that offers email verification, lead finding, and campaign automation features.

Key Features: The platform provides email verification to reduce bounce rates, a lead database for finding contact information, automated drip campaigns, reasonable pricing, email tracking, LinkedIn automation, analytics, API access, basic CRM functionality, and integrations with 2,000+ applications.

Major Problems: Snov.io suffers from a limited database with poor data quality, inadequate customer support with copy-paste responses, no refund policy even for immediate dissatisfaction, frequent bugs with slow development fixes, faulty billing system, and unreliable LinkedIn automation that risks account bans.

Pricing: Plans range from \$39/month (Starter with 1,000 credits) to \$99/month (Pro with 5,000 credits) to custom pricing for enterprise, with 25% annual discounts available.

Better Alternative: SalesRobot offers superior LinkedIn and email outreach automation with simpler UI, better customer support, refund policy, safer LinkedIn automation, team collaboration features, and AI-powered personalization at \$59-99/month.

While Snov.io isn't terrible, its significant limitations make SalesRobot a better choice for businesses serious about LinkedIn lead generation and reliable automation tools.

If you're thinking of integrating Snov.io into your sales toolkit to [automate your entire sales process](#), DO NOT skip this blog!

Snov.io is a well-known **sales automation platform** that guarantees you:

- 👉 **More leads,**

By the end, you'll have all the necessary insights to see if Snov.io is the right fit for your business.

Let's get started!

 [From A to Z: Complete Snov.io Review \(@Snovio\) - What They Don't Tell You! \(Email ...](#)

So, What is Snov.io?

The advertisement banner for Snov.io features a light purple background. On the left, the headline "Find leads, automate outreach & close more deals" is displayed in a mix of dark purple and blue fonts. Below it, descriptive text states: "Discover new prospects, verify emails, reach primary email inboxes, accelerate LinkedIn outreach, and manage leads with a unified inbox." and "Everything you need to scale cold outreach — all in one sales CRM with unlimited mailboxes and unlimited email warmups." Two buttons are present: "Try Snov.io for free" and "Request a demo". On the right, a video player shows a woman speaking into a microphone, with a play button icon in the top left corner. To the right of the video, a vertical flowchart titled "Try Snov.io LinkedIn automation" illustrates a sequence of steps: "Start", "Profile view" (Visit prospect's LinkedIn profile), "Delay" (Wait up to 2 minutes), "Like" (Like prospect's last LinkedIn post), "Delay" (Wait up to 1 day), and "Connection request" (Send without a message).

Source: Snov.io

[Snov.io](#) is a tool that **helps businesses with their cold email marketing and sales outreach**.

Snov.io offers features like **email verification**, which ensures that emails are sent to valid addresses, increasing the chances of successful campaigns.

Snov.io also provides **an email finder**, allowing users to find quality email addresses of potential customers quickly.

This streamlines the process and improves the effectiveness of email campaigns.

Snov.io's suite of tools **automate sales outreach**, making it easier for businesses to manage their email campaigns.

Recently, they also introduced their LinkedIn automation tool.

However, there are some downsides to consider.

Snov.io **has a limited database**, which may make it difficult to find the information you need.

Customer support can be unhelpful, and **your purchases are non-refundable**.

Snov.io also **has some bugs and slow development issues**, which can be frustrating sometimes.

But first, let's look at what makes Snov.io stand out!

Standout Features of Snov.io

Source: Snov.io

#1 Powerful Email Verification:

The Snov.io extension feature of [email verification](#) helps businesses **maintain accurate and up-to-date email lists**.

Source: Snov.io

This feature is particularly valued as it **reduces the risk of bounced emails**, damaging a company's reputation, and affecting email deliverability.

Here are some of the **benefits of Snov.io's email verification** feature:

🌟 **Reduced bounce rate:**

By removing invalid or inactive email addresses from the email list, businesses can reduce the bounce rate and improve their sender reputation.

🌟 **Increased efficiency:**

The email verification process can be automated, saving time and effort for businesses.

The image shows a web interface for a free email verifier. At the top, the title "Free Email Verifier" is displayed in a large, bold, purple font. Below the title, a subtitle states, "We verified over 90 million emails in the last year. We can clean your list too." In the center, there is a white rounded rectangle with the heading "Try Snov.io Email Checker for free". Below this heading is a text input field containing the email address "abc235@gmail.com". To the right of the input field is a yellow button with a warning icon and the text "Unverifiable". Further right is a purple button with the text "Verify". Below the input field and buttons is a light blue rounded rectangle containing the text: "No luck with email guessing? [Sign up](#) to find pre-verified prospects for your business."

Source: Snov.io

With Snov.io's email verification feature, businesses can **verify emails in bulk** and ensure that their email lists are always up-to-date.

#2 Lead Database:

Snov.io's lead database lets users find **email addresses of leads** quickly and efficiently (*which obviously you'll need to verify using their email verifier tool*).

Source: Snov.io

This feature is valuable for businesses that rely on email marketing as part of their sales and marketing strategy.

Here are some of the key points:

💣 **Increased efficiency:**

Generating leads can be time-consuming, but with Snov.io's tools, users can quickly and easily find the email addresses of leads.

💣 **Versatility:**

Snov.io can be used to search for leads on LinkedIn, company websites, and other sources, giving businesses access to a wide range of potential leads.

📺 #1 Lead Scraping Hack to Build a GREAT Target List in 2025

#3 Email Drip Campaigns:

★★★★★ Feb 03, 2024

"Best Lead Generation Tool"

What do you like best about Snovio?

Email finder Plugin and Building the drip campaigns. Now with the AI integration for the content writing is really useful to build the email content in fraction of seconds and saves the time. Email warmup function helps to reduce the spam rate

What do you dislike about Snovio?

I am not comfortable with the Email editor and the fonts are very limited with snov.io

Source: G2

This feature is a game-changer for your email outreach.

It allows you to automate your campaigns and engage with prospects effectively.

Some of the key points to consider:

💡 Personalized emails:

You can create a series of [personalized emails](#) and set them up to be sent at specific intervals.

This ensures that your prospects **receive a consistent and well-timed sequence of messages.**

💡 Automation helps you save time and stay organized:

Once you set up the drip campaign, you can focus on other important tasks while **Snov.io takes care of sending the emails.**

💡 **Personalization is key to successful email marketing, and it allows you to** tailor your messages based on the recipient's behavior and actions.

With this feature, you can nurture leads, build relationships, and increase conversions by delivering the right message to the right person at the right time.

📺 Use the phrase "right person" in your cold emails [+10% reply rate]

#4 Reasonable and Flexible Pricing:

What do you like best about Snovio?

Easy to use, **pricing** is very fair for the effectiveness.

I especially like that I get to know if the emails are sure or unsure to prospects.

Source: G2

Snov.io's [pricing structure](#) is another reason why I liked using this platform.

The plans offered are **not only reasonable but also flexible**, catering to different budgets and business needs.

Some of the key points to consider:

👉 I appreciate that **Snov.io doesn't break the bank**, especially for small businesses or startups. It provides an affordable solution for generating leads and email marketing.

👉 The flexibility of the plans allows you to choose the one that aligns with your specific requirements.

Snov.io is a robust **SaaS platform that provides a Chrome extension suite**.

Snov.io Review: Some other features it offers!

Let's quickly recap how Snov.io can be helpful to you:

✅ **Integrations: Works with over 2,000 other applications and services.**

Tools for communicating with clients, working together, and expanding one's social circle include (but are not limited to) Hubspot, Zoho CRM, Salesforce, Facebook Lead Ads, LinkedIn Lead Gen Forms, and Google Docs.

✅ **Compile a comprehensive database** by collecting data and organizing contacts into qualified lead lists.

✅ **Campaigns may be made more personable** via the use of mail merge modification and bulk email creation.

✅ Determine how many individuals you wish to contact through email before entering addresses.

✅ Increase interest by **tailoring your emails to each individual customer's preferences** and activity history to boost click-through rate and sales.

✅ You may continue to **make changes and add additional recipients to your campaigns** even after they have been sent.

✅ If you're running an email campaign, you may monitor its success with Gmail and alter your approach as needed.

✅ Aside from the built-in Snov.io email tracker, Snov.io also provides a set of **company-built browser extensions**.

✅ **Locates email addresses** while you browse the web.

✅ Using corporate pages, Sales Navigator profiles, and search results, the LinkedIn prospect finder **scours the social network for possible clients to contact**.

✓ Snov.io is helpful for people who use Gmail since it offers an **unlimited Snov.io email tracker**.

✓ **Sending out mass emails in bulk** has never been easier than using Gmail and the GMass email merging add-on.

✓ Access the robust Snov.io Email tracker with this Snov.io Chrome add-on.

✓ This tool serves as a technology checker, revealing the frameworks and languages used to create a given website.

But wait, here are some more standout features of this tool!

#5 The Snov.io Email Tracker:

The Snov.io email tracker tracks which emails are opened and when.

When an email is opened, the Snov.io email tracker instantly sends a notice to the user's device.

The Snov.io extension tracks your prior correspondence with each contact and reminds you to follow up when appropriate.

The ability to schedule email send-offs has long been requested.

#6 LinkedIn Outreach:

Snov.io **recently introduced** [LinkedIn automation as a feature](#) and claims to be the safest [LinkedIn automation tool](#) in the market.

You can either **use its Chrome Extension to look for your target profiles** on LinkedIn or **go through its database search** to find relevant ones.

Once you're done, the **profiles will be saved with their email addresses** and [LinkedIn profiles](#) automatically.

Then you **can create automated campaigns with LinkedIn and email in the same one** to increase chances of conversion!

Snov.io **also lets you warm up beforehand** to avoid spamming people.

And the automation is **completely cloud-based**, so it's safe.

Note: Chrome based automation tools can get your LinkedIn account banned, so use them with extreme caution!

 This AI Voice Agent Helped us DOUBLE our Meeting Book Rates (On Autopilot!)

#7 Analytics:

Instead of relying on conjecture to determine the success of a marketing campaign via email, you may instead use the data provided by Snov.io.

Here, you **can see when certain people opened specific emails** sent to them.

Furthermore, they **offer data on client behavior** that may be used to improve strategies gradually.

#8 API:

Your research of Snov.io should include the fact that **they provide an application programming interface (API)**.

This makes it **possible for customers to link their accounts with virtually any service**.

#9 Functionality of CRM:

Finally, Snov.io gives you a free, rudimentary **customer service tool**.

This allows you to **keep tabs on what products and services customers gravitate toward**.

Connecting with your calendar helps you **confirm contacts and set up meetings**.

Last but not least, **the CRM remembers when employees leave and return to work**, hence lowering your bounce rate.

#10 Snov.io Integrations:

When you use Snov.io, you **may connect to a multitude of pre-existing systems** without any further configuration.

Several applications for sales, marketing, and customer service fall within this category.

Let's separate them into categories so we can examine them more easily.

- **CRMs like Hubspot, Salesforce, and Asana.**
- **Facebook, LinkedIn, Phantombuster, and DuxSoup** are all useful for generating leads.
- Tools for teamwork include **Slack, Trello, and Google Drive**.
- Adaptable content via **NiftyImages and Hippo Video**.
- **Twilio, Intercom, Calendly, and Zoom** are some of the most dependable services in terms of repeat customers.

In addition to these companion apps, **Zapier may also be used with Snov.io**.

The connections are as follows:

Just as with Snov.io, **Zapier can be used to kick off triggers** once a certain condition is met:

But just like everything else, Snov.io is not perfect.

Let's talk about some of its cons now!

Snov.io review: Where Does It Fall Short?

Snov.io | Cons

- Lack of data
- Limited reporting
- Poor customer support
- Poor refund policy
- Bugs and slow development
- Faulty billing system
- Unreliable LinkedIn automation

#1 Lack of Data:

What do you dislike about Snovio?

Email enrichment provided a match of below 10%. I have used other services with >50% matches. Manual matching can get you 90%. Not worth it.

Asked for cancellation since there is not option online (or nothing that can be found) instead of simply keeping a potential customer for future use.

No refund (after just using it for 5 minutes). Customer support ties you up in endless conversation

There is plenty of alternatives.

Dont use Snov.io

Source: G2

The **database within Snov.io is practically empty**, making it as useless as a grocery store with empty shelves.

You will **never find relevant data in Snov.io's database**.

You walk in, hoping to find a wide variety of products, but you're disappointed and frustrated instead.

Snov.io's **lack of data leaves you with no valuable information**, rendering the tool utterly useless for your needs.

#2 Limited Reporting:

What do you dislike about Snovio?

The **reporting** is not as detailed as we wanted. The reports can be downloaded as excel files, but important graphics are missing - which would be useful for our analysis.

Source: G2

While Snov.io does offer basic reporting features, it **falls short when it comes to advanced reporting and analytics.**

If you're serious about tracking your email outreach campaigns and measuring ROI, you'll likely **need a more robust reporting system.**

#3 Poor Customer Support:

☆☆☆☆☆ Aug 31, 2024

"Ridiculous tech team and customer service"

What do you like best about Snovio?

As much as I liked their LinkedIn email finder, **everything else is a waste**

What do you dislike about Snovio?

I permitted them to reset my password because of a glitch. The result was that the new account was deleted and everything from the old account I did not need was imported.

Doesn't end there. I had **set up domain warm-up in the new account - which does not exist and I cannot even start the process in this old/new account anymore** because apparently, it's being warmed up in another account.

Source: G2

When you encounter issues with Snov.io and reach out to their customer support, it feels like **they have a copy-paste button for their responses.**

They repeat terms and conditions without providing any helpful solutions.

It's like talking to a broken record player who only knows how to repeat the same lines repeatedly.

You're left feeling unheard and ignored, desperately in need of assistance, but receiving nothing more than robotic replies as it provides no calling support.

#4 Poor Refund Policy:

What do you dislike about Snovio?

Literally such a poor data collection tool **And customer support refuses a refund** after a few hours of use and the complete realization the product is barebones.

Source: G2

Imagine buying a toy that turns out to be broken as soon as you open it.

You go back to the store, hoping for a refund, but instead, they tell you that you're stuck with the useless toy.

That's exactly how Snov.io operates when it comes to refunds.

Even if you realize within a few hours of using their product that it's nothing more than a barebones tool with limited functionality, the customer support team refuses to grant a refund.

You also **get limited credits for the email verifier, and then they start charging you for it**, or you just keep getting unverified emails, which practically doesn't make sense.

#5 Bugs and Slow Development:

Snov.io extension and [Zapier integration](#) are plagued with bugs, making them as reliable as a car with flat tires.

You're left waiting for ages, hoping for a mechanic to come and fix the issues.

But instead, you're met with a **sluggish development team that takes forever to address the problems**.

Snov.io's slow response to fixing bugs frustrates users and prevents them from utilizing the features that should be working seamlessly.

What do you dislike about Snovio?

Chrome extension and Zapier integration don't work. Their dev team is slow fixing bugs and don't really care. The customer support is extremely slow. Their interface logic makes no sense sometimes. However, you can quickly build your own perfect product using their API

Source: G2

#6 Faulty Billing System:

Snov.io's billing system is a circus!

What do you dislike about Snovio?

I'm in the online business for over 15 years and I've never seen it before that when you enter your company details, VAT number and credit card details, your account gets suspended automatically. They then request a copy of your bank statement + copy of your credit card which is obviously not normal. An online business where you can't pay online with a company credit card and gets your account suspended automatically, is obviously not recommendable.

I advise not using this service and to not waste your time. There's better solutions out there than this.

Source: G2

Orders get canceled without explanation, payments don't match the promised amounts, and the entire process becomes a bewildering nightmare.

Snov.io's **faulty billing system** adds unnecessary complications and headaches to your experience, leaving you questioning why you even bothered in the first place.

#7 Unreliable LinkedIn Automation:

Since Snov.io's LinkedIn automation is still new, it's not fully reliable.

LinkedIn automation comes with great risks and generic messages and uncontrolled automation are sure to get your account banned.

While they **claim to operate smartly within LinkedIn's guidelines**, there aren't enough **reviews** to back it up.

Plus, it's **really really expensive** — **\$69 per account**.

So much for basic LinkedIn automation is not worth it.

You can save yourself time and energy by exploring other alternatives to meet your needs because these shortcomings are bothersome.

How Much Does Snov.io Cost?

Let's talk about Snov.io's pricing plans.

Annual -25% 3-months -5% Monthly

Starter
Turn your business profitable
\$39/mo
Get started
1,000 credits
5,000 recipients
3 mailbox warm-ups
Unlimited monthly emails

Includes unlimited team seats

- 5,000 credits
- 25,000 recipients
- Unlimited mailbox warm-ups
- Unlimited monthly emails
- Available in sizes: S, M, L, Ultra

Custom Ultra Plan: Custom Pricing

Includes unlimited team seats

- From 200,000 credits
- From 400,000 recipients
- Unlimited warm-ups
- Unlimited monthly emails
- Contact sales for pricing

If you pay annually you get a discount of 25%!

Now that you know Snov.io is not-so-perfect, **let's see what you can pick instead for your outreach!**

Your #1 Snov.io Alternative #1: SalesRobot if you need contact data scraped from LinkedIn + automated LinkedIn connection requests, follow-ups, and cold emails in one sequence

[SalesRobot](#) is a really cool [LinkedIn + Email outreach automation platform](#) you can check out if that's your goal.

It has a **super simplified UI**, and the platform is really simple to navigate through.

With SalesRobot, you also get [LinkedIn outreach](#) automation as an additional bonus, and trust me, if you're still not using it for lead generation, you're missing out on something big!

Here's why:

LinkedIn's user base has increased by almost 238% in the last decade.

You can **create customizable campaigns with pre-designed templates or design new ones**, and message your leads with super personalized messages, just like these:

And I know you're **worried about risking your [LinkedIn account's safety](#)**, but you don't have to!

SalesRobot **plays by [LinkedIn's rules](#)** to make sure your account is safe.

[LinkedIn account restricted? Asked to verify identity? Watch this ...](#)

How is it better from Snov.io?

Time for some real talk.

It's our tool, so I'm bragging about it, but why would you pick SalesRobot?

- **Learning Curve?** Unlike Snov.io, none!

★★★★★

Dec 03, 2023

"Amazing tool I am using daily"

What do you like best about SalesRobot?

I really like the flexibility that comes with SalesRobot and the user-friendliness. It's also highly scalable, which is esp. important on LinkedIn, as LinkedIn outreach is extremely manual. Support is also great! Easy to implement - I think it took me 10 minutes or less to do the set up. Been using it daily ever since.

What do you dislike about SalesRobot?

Can't think of anything right now currently. Might be an even stronger emphasis on AI, but I heard that will come!

Source: G2

JK!

Snov.io's **UI received much praise from users**, but they still mentioned **needing help to navigate the platform** in the beginning.

You won't face it with SalesRobot.

Even a 5th grader can easily use SalesRobot without any help.

Yep, it's that simple!

- **Refunds?** Oh yeah!

We have **no questions asked refund policy** if you're not satisfied with our services.

- **Great customer support?** We got you!

★★★★★ Mar 20, 2023

"Still positive after 2 months"

What do you like best about SalesRobot?

UI is intuitive, especially if you've used other software before.

I like the safe mode feature and that activities are done in ranges to mimic human behaviour.

Customer **service** is very helpful and they have an extensive library of tutorials if you run into issues.

Would 10/10 recommend

What do you dislike about SalesRobot?

I don't see any downsides currently when comparing to other tools I've used in the past.

Source: G2

Our **customer support team is available 24/7, without breaks**, so you never get stuck in your outreach.

- **LinkedIn account safety?** Don't worry, **we follow all the rules**.

What's more?

Our intuitive AI can safely bypass [LinkedIn limits](#) so your account won't get banned.

▶ How to ethically bypass the weekly LinkedIn 100 connections limit without getting ban...

- **Team player?** Sure!

A lot of people said that Snov.io doesn't work well with teams.

SalesRobot will **give you role-based access control** so your team can work seamlessly!

- [Personalized outreach?](#) Hell yes!
- [AI Assistant?](#) It's here

Now, AI can reply to your prospects and book meetings without your intervention.

Bid farewell to those generic messages and say hi to **SalesRobot's super personalized outreach messages.**

You can **craft your own messages to customize them for each prospect.**

And that's not all!

You also get:

[AI Variables](#)

This feature uses a set of prompts that scan a prospect's LinkedIn profile and pick out relevant details (like recent activity, job role, company size, etc.).

Then the tool merges those details into your outreach message so it looks like you researched them individually.

[AI Voice Messaging](#)

You can create personalized voice notes using cloned voices or your own recorded voice.

The system allows sending these voice messages at scale while keeping them specific to each prospect.

[AI Video Messaging](#)

You can send short personalized video notes through the tool.

These videos help you grab attention and make your outreach feel more human.

AI Commenting

Instead of manually going to every prospect's profile and engaging with their posts, you can now personalize your LinkedIn comments, at scale.

SalesRobot analyzes the prospects' latest post, and generates a comment based on the prompt you give. This way, the comment is highly personalized and doesn't sound forced or robotic at all!

AI Inbox Manager

This feature handles incoming prospect replies and objections 3x better than an SDR.

It converses with prospects, asks qualifying questions, and moves interested leads toward booking a meeting.

You only step in when a prospect is ready, so your calendar fills with higher quality meetings without extra manual inbox work.

To know more, you have to [try it out yourself!](#)

Don't worry; we just need an email address, and SalesRobot is free for you for 14-days.

How Much Does SalesRobot Cost?

SalesRobot offers [three pricing plans](#) which are priced at \$59/month, \$79/month and \$99/month. You will get an additional 35% off if you choose to pay yearly.

Final Say on This Snov.io review

Lead generation is the #1 priority of every business, and it's definitely not a piece of cake.

Automation tools do make your work easier by managing repetitive tasks and keeping track so you can focus on other essential stuff.

But how will you do so if you're juggling with new problems related to your automation tool only everyday?

It doesn't make sense, right?

Which is why, you need to:

- Make a **list of your wants and needs** once you've thought about them,
- Focus your **money where it will do the most good**,
- Experiment with **the trial or the free version**, and
- **Find out which one works for you.**

Snov.io is not a bad tool, if you can afford it considering its shortcomings.

But if you are serious about lead generation and want quality leads right away (especially from LinkedIn), [SalesRobot](#) might be the better option for you... safer too!

SalesRobot is excellent, where Snov.io fails while providing better automation with LinkedIn as an additional channel.

Don't believe me yet?

"Salesrobot's approach to selling on LinkedIn offers great flexibility"

What do you like best about SalesRobot?

With this flexibility, you can tailor your marketing strategies to the specific needs of each campaign, ultimately maximizing efficiency and results. This level of customization allows for targeted and impactful outreach to your audience.

What do you dislike about SalesRobot?

To achieve effective communication with SalesRobot, it is essential to maintain a genuine and sincere tone in your messages. Although SalesRobot amplifies your outreach as a robot and greatly assists with message ratings and AI, it is necessary for you to exert effort in crafting messages that foster a human-to-human connection.

And [try it out for free](#) for 14-days to experience it firsthand.

That's all from my end,

See ya!
