Universitas Muhammadiyah
Yogyakarta, Indonesia

I'm very glad to be part of exchange student at College of Social Science in National Cheng Kung University (NCKU), Taiwan. It such awesome memories that will not be forgotten, gain new experience here was no regret. I don't feel strange

with the environment, it keeps me comfortable and feels like home. Having many international friends and local friends was fun, we shared stories each other, took to each traditional restaurant for tasting food from another country. And I'm in love with all foods here for my 5 month as international student.

The only difficulty I faced was in College of Social Science that the limited subject taught in English, due to my incapability make me hesitate to take the subject on those courses. I only take one course in College of Social Science taught in Chinese. Fortunately, the professor helps us for using a book and power point took in English. However, the classmates were so kind for always helping whatever and whenever problem I had. The good things, NCKU education system provides us to take elective courses from other departments, which is helping me to find courses taught in English and I interested in.

We got a warm welcoming from the campus together with all the International students include master students, PhD students, Under-degree students, Join-degree students, and exchange students as well. In the welcoming ceremony, National Cheng Kung University gave us many information about campus's environment, the facilities and many more to help us for survive.

We also feeling home because we met many Indonesian student in PPI NCKU, got warmth welcome, join an Olympic games competition, and Indonesian cultural day (ICD) 2018. With no regret, I'm proud of myself got an opportunity as a main actor in drama "Story of Prambanan Temple" ICD. Its my first time acting, PPI NCKU got me to have a new talent and shown it to many International student there.

Taiwan is a country of extraordinary memories, the warmth, openness, generosity of the people shown me how lovable they are. Talk and travel around Taiwan which spending my exchange period got so fast. Otherwise, life in Tainan was something that you never forget every detail, the taste of food, historical building that we can get in another country.

Last but not least, I really thank to all of people who always help and accompany me. They are bestfriends from Ching Yeh 3, Taiwanese people, and very helpful CSS NCKU's Staff, also all of Indonesian friends during my exchange student and made my time at NCKU so special, I can't imagine a better exchange program experience than the one that college of Social Science of NCKU Taiwan provided.
