

[Tennessee opens its first chronic wasting disease testing facility](#) April 23, 2021

10 News

... The highly contagious and inevitably fatal neurological disease has firmly established itself in Southwest Tennessee deer, but has not been found in deer further east yet... its first testing lab...

[Tennessee's First Chronic Wasting Disease Testing Facility Is Open](#) April 23, 2021

Chattanooga.com

... The CWD testing unit is operational and fully accredited by the International Organization for Standardization, the organization that develops and publishes international standards... Findings in the testing process inform why some deer get CWD and others don't, and the lab archives samples for study...
