

Let's start

Step 0

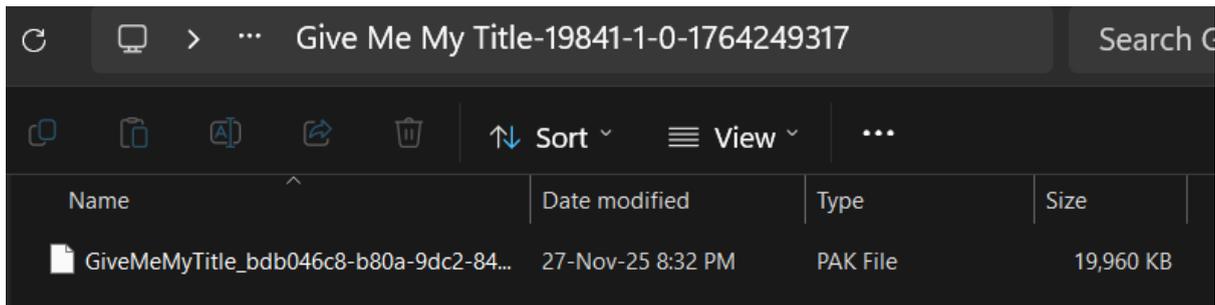

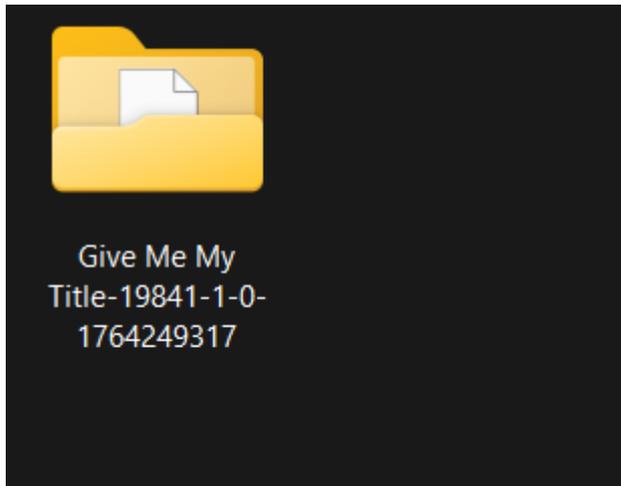

Make sure you have Export tool and Multitool.

[Releases · Norbyte/lslib](#)

[BG3-Modders-Multitool](#)

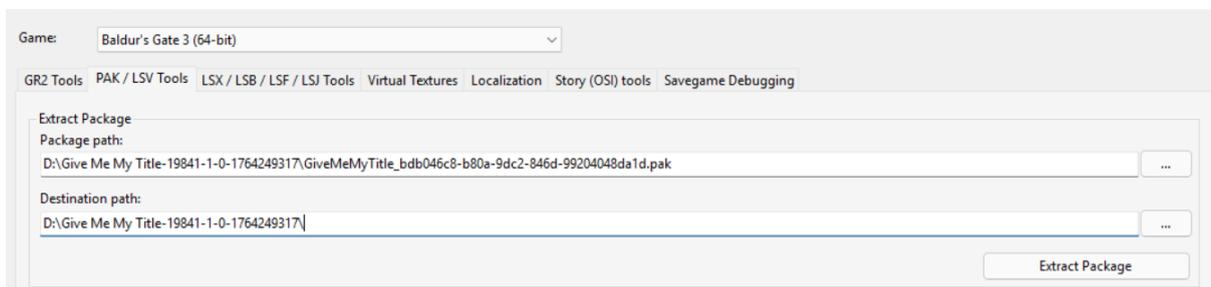

Step 1

Download the mod and extract the file to be pak file inside folder.

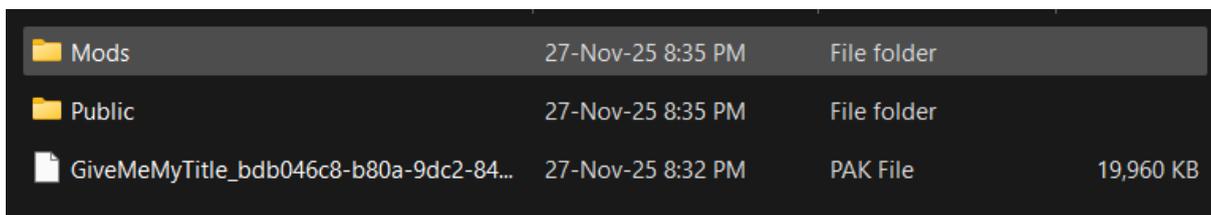

Step 2

Use the export tool to transform pak file into editable format

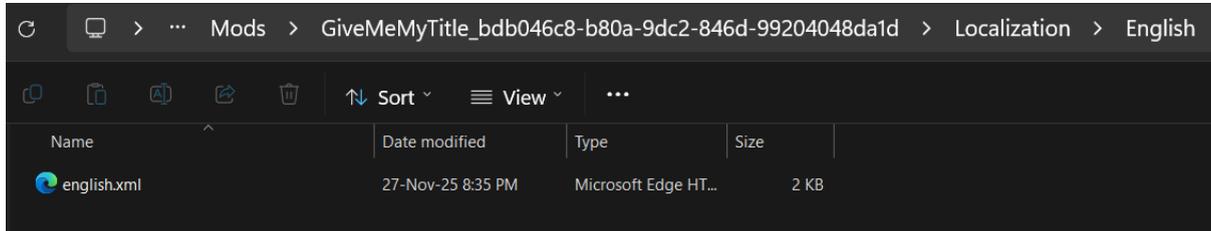

It should come out like this, then delete the pak file

Step 3

Navigate through folder Mods >

GiveMeMyTitle_bdb046c8-b80a-9dc2-846d-99204048da1d > Localization > English > english.xml

Open xml file in any editor program you like

Step 4

Tab title is the last line and Durge title is second last line. The rest are for companions. They use the same editing method.

```
