# Hentairim Enjoyment Expressions Traits

By ShimizuModding

## Background

This Mod is Forked and enhanced/modified from Hentai NPC Traits & Enjoyment in

<https://www.loverslab.com/files/file/26300-ivdt-140-hentai-edition-v4-voice-packs/>

It has taken many countless hours to craft to add more immersions and effects for your enjoyment. Please go through this guide before posting for support in the Thread.

If you wish to support the efforts, you can [Buy Me A Coffee!](#)

## What does this mod do?

### For First Time Users

There are 4 main features of this mod.

- 1) Complete Redesign of the Enjoyment Calculation of SLSO
- 2) Continuously changing with a variety of Expressions depending on the sex scene.
- 3) NPCs get assigned unique traits which may change the Sex Scene behavior or enjoyment increments.
- 4) Introducing the “Resistance & Aggression” system, which leads the actor to be “broken: if it is depleted. Broken status leads to altered enjoyment multipliers and behaviors in other Hentairim Mods

### For Users who was using Hentai NPC Traits & Enjoyment, these are the main changes since the predecessor:

- 1) Expressions from iVDT Hentai has been migrated here, and can now apply to all NPC in the same scene.
- 2) Additional Enjoyment modifiers by Race
- 3) With Hentairim tags, Enjoyments for every action is added additively. E.g., if an actor is getting stimulated and penetrated at the same time, Enjoyment will add from SST and SVP
- 4) Additional expressions to display for kissing and cunnilingus.

# Hentairim Enjoyment Expressions Traits

By ShimizuModding

- 5) Cap enjoyment if it is just lead in and no stimulation involved.
- 6) The broken system is moved from Hentairim IVDT to this mod and is triggered by the "Resistance & Aggression" system.

## Requirements

- 1) Sexlab - <https://www.loverslab.com/files/category/228-sexlab-framework-se/>
- 2) Sexlab Separate Orgasm - <https://www.loverslab.com/files/file/5929-sexlab-separate-orgasm-se/>
- 3) MFG Fix NG (if you are using Hentairim Expressions) - <https://www.nexusmods.com/skyrimspcialedition/mods/133568>
- 4) Hentairim Tags - <https://www.loverslab.com/files/file/41502-hentairim/>
- 5) Anim Speed SE (if you want to have the Game Effects) - <https://www.patreon.com/posts/animspedse-103787087> (download **AnimSpeedSE** not **AnimSpeedSexlab**)

## Conflicts

This mod modifies the sslactor.pex which conflicts with some other mods like Sexlab P+ , Sexlab utility plus, hakkey tweaks which makes the same edits. Use Mod Organizer to check what is replacing sslactor.pex

## Main Features Setup

### Enjoyment

The original SLSO calculates enjoyment based on elapsed time, stage, Sexlab skills, and some other variables which are not seen nor experienced by the player. Hence this mod aims to provide predictability and control over the enjoyment that an actor receives. Apart from the fixed values, actors can be affected by a few other gameplay modifiers such as Arousal, Broken Status, Orgasm Count, and victim status.

With the new tags from Hentairim tags, every actor's enjoyment are incremented based on the values in the config.json file at every tick, which is also configurable.

Edit the config.json file to adjust your enjoyment increment rate according to your gameplay.

### Expression Phasing

Periodically Phases the expressions based on configured Json files in the mod folder. The intensity and frequency of expression updates will increase as the intensity of the scene increase.

There are 3 different Expressions files meant for different NPC's.

PCExpressions.json - Expressions config file for Female PC

FemaleExpressions.json - Expressions config file for Female NPC

MaleExpressions.json - Expressions config file for Male NPC

If you intend to edit the current expressions preset for your own setup, use the following spreadsheet as guide. Make a copy of the spreadsheet for your own usage, then update the values and copy the array formula into your own Json file.

[Hentairim Expressions Doc](#)

### Sub features

Tongue - a chance for PC to stick out tongue when broken or scene gets intense. Requires Fill her up Baka mod installed. Build the tongue bodyslide for correct positioning for your PC.

Masks - Specify the masks keywords in Json file which prevents sticking out tongue, avoiding the tongue clipping through masks, and removing the masks when blowjob is involved.

## NPC Traits

This mod also comes with the feature to assign various hentai traits to NPC, where it will change the enjoyment gain rate for NPC and PC as well apply appropriate sex effects like additional/shorten timer.

The NPC Hentai trait will be displayed on the SLSO Enjoyment Widget, such as "Rape Loving Alvor" or "Sexually Frustrated Delphine" . one NPC can only have one hentai trait. teammates are deliberately defaulted to "Normal" or no hentai trait.

### Aggressive

- > NPC is impatient and tend to shorten non intense stages and spend more time in Intense stages if in control
- > Enjoyment during intense scenes up , non intense scenes down

### Masochist

- > NPC likes being dominated by PC. Affects Masochist NPC if getting it in animation tagged with Cowgirl , Femdom, Amazon, molag, dirty, rape, forced
- > NPC Enjoyment with Cowgirl, Femdom, Amazon doubled. enjoyment drops if not being dominated

### Sadistic

- > NPC likes dominating PC. Affects Sadistic NPC if giving it in animation tagged with Cowgirl , Femdom, Amazon , molag, dirty, rape, forced
- > NPC Enjoyment doubles in affected scenes, and drop during non dominating animations.

### ShortFused

- > NPC have very high starting enjoyment, then loses half it enjoyment after orgasming the first time

### Skilled

- > NPC grants more enjoyment to PC during blowjob and penetration stages
- > PC receives 40% more enjoyment from Skilled NPC

### Strong

- > NPC has higher overall Sex Stats
- > 20% higher starting Enjoyment. gives PC 30% more enjoyment, does not lose steam even after orgasm

### Thicc Loving

- > NPC likes thicc PC
- > increases enjoyment by 50% if PC weight > 70

# Hentairim Enjoyment Expressions Traits

## By ShimizuModding

### Timid

> NPC loses 10% of Enjoyment

### Weak

> NPC has lower overall Sex Stats

> PC Receives 20% more enjoyment, NPC loses 20% of enjoyment , NPC has 20% less starting Enjoyment

### Impatient

> NPC has 20% Starting Enjoyment

> NPC tends to Skip Lead in to Penetration Scenes if in control

### Rape Loving

> NPC Likes Raping Victim PC

> NPC gains double enjoyment. NPC retains most of the enjoyment even after orgasm and wont lose steam.

### Miss Cumalot (Female only)

> NPC Orgasms very often

> NPC gains double enjoyment. NPC retains most of the enjoyment even after orgasm and wont lose steam.

## Resistance & Aggression

The original SLSO depicts enjoyment in 2 parts in a widget, 1 being the number above the bar, while the 2nd one the incrementing bar itself. This Feature took over the bar to represent the "Resistance" of the actor.

PC & Different NPC races can be configured to have different resistance levels. For example an elf might have lower resistance while a dwarven sphere has very high levels of resistance. Actor Resistance is damaged with sex Enjoyment, configurable whether resistance can be damaged during victim or non victim.

When an actor is Resistance is damaged to 0%, the actor will fall into a Broken state which will have effects on the actor's enjoyment as well as the other Hentairim Mods. read the configurations available on different mods that make reference to the Broken status to understand their effects.

Resistance will be damaged directly by the enjoyment values after being affected by various multipliers.

The Actor's Resistance will recover by a configurable percentage for every hour the actor is not having sex.

# Hentairim Enjoyment Expressions Traits

By ShimizuModding

## Broken Status

The Broken status is triggered after losing all the resistance and stays broken after a configured amount of time.. This Feature is mean to simulate the effect that PC has been continuously raped far long in a short time span, which puts her into a broken state, that further leads to other effects, such as

- > Changes to Enjoyment gain multiplier
- > Dedicated Broken Expressions
- > Ahegao Face

## Game

Soft Requirements : Anim Speed SE

The Game in Hentairim is basically reimagined and recreated to suit the design philosophy of Hentairim Enjoyment. While utilizing the same input keys in SLSO MCM, (default **Shift** for modifier , **Left Click** and **Right Click**) you are able to do these few things:

**Left Click** - Kick up the speed gear a notch! By Left Clicking Once, you will turn up the Speed Gear by 1 , and the anim speed goes faster while actors gain more enjoyment at te cost of stamina to simulate a quick burst of “affection”. Although not a hard requirement, and the game still works without Anim Speed SE installed, it is highly recommended for the full experience.

**Right Click** - Modifies self enjoyment based on config values at the cost of magicka.

**Shift** - when held onto, Left Click reduces the Speed Gear , and right clicking inverses the enjoyment value in the config and applies to PC/

If your hands are too busy for this clicking game, you can always enable the autoplay for PC configure the behavior in the config.

### How It Works:

#### **Glossary:**

**Attacker** - Actor who appears to actively controls the scene, such as Male (Attacker) doggy penetration female (Receiver), or Female (attacker) is femdoming male (Receiver) in a cowgirl position. Sexlab Victims cannot be attackers regardless of position.

**Receiver** - Basically the opposite of attackers who is the target of the attacker's “activity”. No this has nothing to do with being sexlab victim, it merely identifies who are the primary ones on the receiving end of the scene.

# Hentairim Enjoyment Expressions Traits

By ShimizuModding

**Speed Gear** - just as the name suggests, the speed level of your current animation scene. The higher speed level you go, the faster your anim plays (if animspeed SE is installed) , and the more enjoyment gained by actors as well as stamina consumption

At periodic intervals in PC's sexlab stage, the game will identify who the Attackers and Receivers are. Attackers are the ones who can increase the speed gear for the stage to simulate control over the stage, while Receivers can only modify ownself's enjoyment with magicka.

The more steps the animation speed reaches, it multiplies with the stamina consumption as well as enjoyment being gained by the receiver, and also the attacker if it is a penetration stage.

The Speed Gear will revert back to 0 if the attacker runs out of stamina or orgasms if configured, and rerun the cycle when the Attacker regains full Stamina.

**By Default this Game feature is disabled to avoid shock therapy to new users Enable it in the config file.** Everyone has their own scaling and playstyle, so it would do you good to go through the Hentairimgame.json config values and imagine how it would fit your game. The current preset is gearing towards :

- > PC/NPC only decrease self enjoyment if Victim
- > PC/NPC can speed up the anim if its aggressor and not victim.
- > Magicka/Stamina consumption are percentage based instead of absolute to avoid unnecessary problems from scaling.

## Configuration Files

All Configuration Files are stored in SKSE\Plugins\StorageUtilData\HentairimEnjoyment\

Remember that when you are editing the entries in the various json files, **the contents must be in lowercase**

### Config,json

Main Configurations of this mod are done here

This is what the options in **Config.json** do:

The options in the “Float” Section refers to the amount of enjoyment the actor should increment in the scene. Such as **pcsvp** pc referring to the player, svp the Hentairim tag, while npc referring to the npc actor, the names of the tags should be self explanatory.

Options with “seconds per tick” essentially how often the enjoyment should be incremented. The lower the number, the faster the enjoyment will be incremented.

## For Modders

**`HentairimSpeedGear = StorageUtil.GetIntValue(None, "HentairimSpeedGear", 0)`**

You can control the speed of the animation by setting the **HentairimSpeedGear** storageutil with `StorageUtil.SetIntValue(None, "HentairimSpeedGear",3)`

**`HentairimResistance = Game.GetFormFromFile(0x854, "Hentairim Enjoyment Expressions Traits.esp") as Faction`**

HentairimResistance Faction stores the percentage of the remaining actor's resistance. If it goes to 0, it will trigger and Add Rank to HentairimBroken

**`HentairimBroken = Game.GetFormFromFile(0x853, "Hentairim Enjoyment Expressions Traits.esp") as Faction`**

HentairimBroken Faction stores the number of hours left to stay broken. If rank = 0 , it is considered as not broken. Since its a faction, it can only store rank until 127.

**`StorageUtil.GetIntValue(None, "HentaiBlockPCOrgasm") > 0`**

If the storageutil **HentaiBlockPCOrgasm > 0** , it will prevent PC from orgasm until it is set back to 0. You can use **`StorageUtil.GetIntValue(None, "HentaiBlockPCOrgasm" , 1)`** to set the value.
