

## **Professional cigar cutter**

### **PAS Format**

**Avatar:** Jason is a passionate cigar smoker, he likes to indulge and spend large sums of money on the fanciest cigars around. He has an expensive high end lighter, and a decent cigar cutter, but everytime he goes to cut his cigars they get ruined because the cutter isn't sharp enough which leads to an uneven and rough cut. John wishes he had a cigar cutter that would cut the end of his cigar perfectly with no hassle.

SL: Read this BEFORE you smoke your next cigar!

If you're reading this I'm guessing you're probably passionate about your cigars.

Well being passionate about your smoke means you need to have the right tools.

What do I mean by tools?

You are probably thinking "i already have a nice lighter" But we're NOT talking about lighters here.

Do you get frustrated and give up when it comes to the moment of cutting the cigar, and wonder how could such an easy task be so daunting?

Just imagine, you've bought an expensive cigar, you sit down excited to smoke it, you go to cut it and feel that the blade is not cutting, so you push with all your might and "CLACK!"

You've made a jagged, rough cut and the experience is RUINED.

Imagine a cigar cutter that makes a perfect cut, slides through like butter with no effort, leaving you with an enjoyable stress free smoke session ahead of you.

That cutter exists...

Eliminate the fear of ruining your cigar and wasting your money, and start making perfect cuts on your cigars.

You've already got nice cigars, and a high end lighter, so you know what's missing.

Click [here \(link\)](#) to enhance your smoking experience, and stop worrying about THE CUT.

P.S this cutter is only for REAL cigar enthusiasts.
