

Digital Display Discovery

The process is as follows:

- The department specifies the location and meets with CAT staff
- CAT help determine the size, brand, and specs for the display
- CAT provides a quote to purchase the display and mount
- CAT provides a link to the computer to purchase (~\$130)
- Once on site, CAT will configure the computer to display our channel content
- CAT team coordinates with facilities to install the display
- Once the display is installed, CAT installs the computer
- CAT works with our DEPT to develop our content template. This can be similar to what SCD is running, or more complete.
- Content curation and sign administration is handled by the department (based on the template, this could be a google slideshow)
- CAT handles maintenance and makes sure the sign is up and running.

CAT recommends mirroring the setup that SCD has to provide a more appealing presentation.
