

Cyberbeavers Game Proposal

Proposer

Matt Stasiak - Warp.cc

Overview

This proposal will outline a roadmap of items to be funded and built in the TRUNK ecosystem by a Team of builders and designers.

Game Overview:

Cyberbeavers is an innovative 2D game combining token distribution, earn-to-play, and kill-to-play mechanics, all set in a captivating cyberpunk universe. Developed on the AO platform, the game boasts a talented team featuring developers from Warp, AoBuilders, and Redstone Oracles. The current in-game tokens include CBC, with wAR and tIO tokens being integrated soon.

Our mission is to accelerate the growth of the AO ecosystem, and we would love to incorporate Trunk tokens into the game. This will allow players to earn and explore Trunk within the game environment, wAR and new members.

Upcoming Gaming Session:

Join us for the next gaming session scheduled for Friday at 14:00 UTC. Check out the game and participate by joining our Discord and signing up on the #whitelist. Links will be shared in the general channel prior to the session. We continuously update the game weekly, enhancing features like death animations, new token integrations, and matchmaking atm.

Token Distribution Plan:

Currently, CBC tokens are the primary in-game currency, with new tokens being added regularly. Players can expect to earn 50 rewards tokens per game, with 6 games per session and 4-6 gameplay sessions per month. This results in an estimated 5,400 rewards over three months. We can do 1 token for reward, and we can do partial rewards, as with wAR. For initial testing, we recommend transferring \$750-\$1,000 worth of Trunk tokens, which will be fully distributed to gamers. This strategy will promote Trunk tokens and boost awareness among the gaming community. Your KPI focuses on gamers earning Trunk tokens and being encouraged to purchase more.

Special Event Proposal:

We propose hosting a dedicated Trunk Tournament Day, where 10-20% of the initial tokens are distributed to maximize media presence. With the combined reach of Warp, AoBuilders, and Redstone X profiles, covering over 150k members combined, this event and overall promo colab with us, will significantly amplify Trunk's exposure. We will maintain consistent token promotion to ensure sustained interest and engagement. Arweave Wallet for Token Transfer: Arweave Wallet Address: jnioZFibZSCcV8o-HkBXYPYEYNib4tqfexP0kCBXX_M By integrating Trunk tokens into Cyberbeavers, we aim to create a dynamic and engaging experience that benefits both the AO ecosystem and the Trunk community.

We believe this proposal outlines a win-win relation with Trunk DAO . If you have any questions or need further details, please feel free to contact Matt Stasiak, BD & Partnerships, matt@warp.cc

Total Funding Requested: 100 \$TRUNK
