PARAMETERS
fileId;

Revoke the sharing permissions that you have granted to another user from a file with a given ID.

Use cases

- Stop sharing documents with a specific user, by group or domain or with anyone
- Revoke access to shared documents for unsubscribing users

Configuration

Click on the **bold** text in the title of the building block to open the configuration dialog.

Useful combinations

You can either click on the keyboard icon to generate a form where you can enter the file id manually - or you can use the Find File building block to search for a file by name and retrieve the file id.

Unshare files as an employee changes her/his position

Find price list

Unshare file

fs-drive icon-file,icon-unshare

<https://help.ultradox.com/en/reference/googledrive/unsharefile.html>,Jump to unshare file building block

PARAMETERS

priceListFileId,fs-green;Unshare price list

email,fs-yellow;

Just as specific files can be shared they can also be un-shared. If a sales employee changes her/his department you may want to unshare some price list that is not relevant for the new position.
