

- 6) How many containers has Cassidy checked?      7) What is the least amount of strawberries in a container?
- 8) What is the most amount of strawberries in a container?      9) Describe the pattern you can see in the stem and leaf graph.
- 10) Think of two other statements you can make about the information provided in the graph.

### School tests

Every year the senior classes at Hill Top Primary School complete a basic facts test. The table below shows the average mark that students in the five senior classes received.

- 11) What is the average test score for students in Room 2?
- 12) What classes have the highest test score?
- 13) At Hill Top Primary School the oldest students are not in the class room with the highest number (or the lowest number). What classroom do you think the oldest students are in? Explain your answer.
- 14) Can you tell from this test whether boys are better at basic facts than girls?

- 15) Why can't you be sure that the test is out of fifty?

### Time spent learning spelling words

Craig used a tally chart to record the minutes he spent learning his spelling words each night. Use this chart to answer the questions below.

Day	Number of minutes
Monday	
Tuesday	
Wednesday	
Thursday	

- 16) Craig has a piano lesson one night which makes it hard to complete his homework. On which night do you think he has the piano lesson?
- 17) In how many minutes did Craig learn his spelling words for this week?
