

What is website ?

=> website is the collection of data in the form of Images, Text and Videos in a well and organised manner. We can make our presence online.

Pages - Pages help in building a information and profile building of our business and services on the website.

Plugins - It is one of the components which helps to function a website. It also helps in adding new features, improving functions and different customization.

For example

- ELEMENTOR PLUGINS

ELEMENTOR PLUGINS helps in designing a website in simpler way. Main function of elementor is that we can easily use drag and drop services in page building.

- Drag and drop feature
- Easy customization
- Pre designed templates
- widgets
