**Habits:** He has a habit of twirling a guitar pick around his fingers when nervous, resulting in him always carrying one (or more) around.

**Hobbies:** Creating music, reading books, messing around with his guitar

## BIOGRAPHY

Being the oldest in a family of 10, Atticus grew to be very responsible at a young age. Due to his father’s death and his mother constantly working, he mainly took care of his younger siblings. This resulted in becoming very dependable and more of a brotherly figure to anyone he met. He tends to take anyone younger than him under his wing, whether they like it or not. Sometimes he slips back into his “overly protective brother” mode when it comes to his friends. He makes mistakes like answering a question aimed at his friends, or apologizing in their stead, or telling them off for some “immature” behavior. He was used to following whatever his mother, or siblings, asked of him (his siblings’ requests that were within reason). This caused him to find it hard making his own decisions for himself as well as becoming more complacent when it came to things asked of him. To his friends, he was often joked about when it came to being able to be pushed around with little consequence.

In Highschool, he played in a band he and his friends made called, **Future Stigma**. He was the lead guitarist and backup singer, as well as the lead songwriter. This was when he developed his talents in music production and found a love for certain music artists. Unfortunately, after highschool the group disbanded after the untimely death of their lead singer and Atticus’ younger brother, Lyric Folly. After Lyric’s death, Atticus became even more possessive and protective of the rest of his younger siblings. For the better or the worst? Well, that’s for your own judgement.
