

International Journal of Research in Social Science and Humanities

: □18 Bold

First Author¹ Second Author² & Third Author³¹Designation, Affiliation, Department of xxx, xxx, Country²⁻³Designation. Affiliation, Department of xxx, xxx, Country**ABSTRACT □ 12Font Bold**

Abstract should convey the importance of your research in a concise and logical manner. The abstract is a synopsis of the original study that addresses the research problem, the information and methods used to address this problem and your conclusions. It should be presented in introduction body research contribution flow. It should present only key points without exceeding a length of 300 words. The abstract is to be in fully-justified text, at the top of keywords in single column format, below the author information □10Pt, 1.15spacing

Key Words: *Five Keywords are Required Separated by Commas (Capitalize Each Work Italic)*

1. INTRODUCTION □ 12 Font Bold

This guide provides details to assist authors in preparing a paper for publication in ijagri.org so that there is a consistency among papers. These instructions give guidance on layout, style, illustrations and references and serve as a model for authors to emulate. Please follow these specifications closely as papers which do not meet the standards laid down, will not be published.

2. MODEL PAPER

Centered at top of the first page should be the complete title of the manuscript, followed by name(s) of author(s), affiliation(s), mailing and email address (es). This is followed by the abstracts under the heading ABSTRACT, keywords under the heading Keywords and followed by the text. The text should be typed in single space, using a font similar to the one used in this text (Times, 10 points). Paragraphs should be separated by 1.15 spacing.

Select For A4 paper, use the A4 paper settings (Narrow)**A4 margins****Top = 1.27cm (0.5')****Top = 1.27cm (0.5')****Left = 1.27cm (0.5')****Left = 1.27cm (0.5')****2.1 Sections and Subsections □11Font, Bold**

Sections and subsections should be numbered and titled as 1.0, 2.0, etc. and 1.1, 1.2, 2.1, 2.2, 2.2.1, etc. Capital letters should be used for the section titles. For subsections, the first letter of each word should be in capital letter and followed by small letters. One line space should be given above the sub section while no space should be given below the heading and text.

2.2.2 Identification of sub subsections □10 Font Bold

Subsub section has to be in sentence case with no spacing above or below the start of it.

Section	Letter style	Font	Remarks
PAPER TITLE	New Times Roman	16	Bold
Author name	New Times Roman	12	-----
ABSTRACT	New Times Roman	10	Italic
1. MAIN HEADING (Caps)	Times New Roman	12	Bold
1.1 Sub Heading (Capitalize Each Word)	Times New Roman	11	Bold
1.1.1 Sub Heading (Capitalize Each Word)	Times New Roman	10	Bold
Text	Times New Roman	10	---

3. TABLES AND FIGURES

Figures should be labeled with "Figure" and tables with "Table" and should be numbered sequentially, for example, Figure 1, Figure 2 and so on (refer to table 1 and figure 1). The figure numbers and titles should be placed below the figures, and the table numbers and titles should be placed on top of the tables. The title should be placed in the middle of the page between the left and right margins. Tables, illustrations and the corresponding text should be placed on the same page as far as possible if too large they can be placed in singly column format after text. Otherwise they may be placed on the immediate following page. If its size should be smaller than the type area they can be placed after references in singly column format and referenced in text. Table captions should be centred above the table.

Section	Letter style	Font	Remarks
Paper title	New Times Roman	16	Bold

2. HELPFUL HINTS

Figure captions should be centred below the figures; table captions should be centred above. Avoid placing figures and tables before their first mention in the text.

Figure1.1: Details of manuscript font size

2.1 Units & Abbreviations

Use words rather than symbols. For example, write "Magnetization," or "Magnetization (M)" not just "M." Put units in parentheses. Do not label axes only with units. In the example, write "Magnetization (A/m)" or "Magnetization (A·m^l)." Do not label axes with a ratio of quantities and units. For example, write "Temperature (K)," not "Temperature/K." Multipliers can be especially confusing. Write "Magnetization (kA/m)" or "Magnetization (10³ A/m)." Figures labels should legible, about 10-point type.

3. ABBREVIATIONS AND ACRONYMS

Define abbreviations and acronyms the first time they are used in the text Metal Matrix Composite (MMC). Do not use abbreviations in the title and abstract unless they are unavoidable.

3.1 Equations

Number equations consecutively with equation numbers in parentheses flush with the right margin, as in (1). To make your equations more compact, you may use the solidus (/), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use an en dash (–) rather than a hyphen for a minus sign. Use parentheses to avoid ambiguities in denominators. Punctuate equations with commas or periods when they are part of a sentence, as in

$$a + b = c. \quad \text{-----} \quad (1)$$

Symbols in your equation should be defined before the equation appears or immediately following. Use "(1)," not "Eq. (1)" or "equation (1)," except at the beginning of a sentence: "Equation (1) is ..."

33. Units

Use either **SI (MKS)** or CGS as primary units. (SI units are encouraged.) English units may be used as secondary units (in parentheses). An exception would be the use of English units as identifiers in trade, such as “3.5-inch disk drive.”

ACKNOWLEDGMENT

Do not number ACKNOWLEDGMENT and REFERENCES

REFERENCES

References should be listed at the end of the paper in alphabetical order. Articles in preparation or articles submitted for publication, unpublished observations, personal communications, etc. should not be included in the reference list.
