

Practice Task: Write A Lesson Plan

Goal: Explore how AI can assist with creating a lesson plan

Tool Featured: Gemini
(Khanmigo and SchoolAI can do this too)

TASK STEPS

1. Navigate to [Gemini](#)

2. Paste the following prompt into the “Enter prompt” dialogue box. If you wish, edit the prompt to make this task more relevant to you.

Format: [Enter your persona], [state your aim and recipients]. [Describe the theme and structure].

I am a middle school English teacher. Create a technology based lesson plan on cyberbullying for 8th graders that I can use during digital citizen week. Include current references. The class is 45 minutes long and the lesson should have a bell ringer and a closing activity.

3. Run the prompt

4. Review the output

- Does the output address the prompt?
- Does the output appear to be thorough and appropriate?
- Did the output leave any lesson components out?

Optional Next Steps:

- Revise your prompt as needed, adding specificity
- Make a follow up prompt:
 - Revise the above lesson to include more opportunities for cooperative learning
 - Redesigning the lesson with a focus on inquiry-based investigation
- Rate the response

Tip! Click the Share & Export icon to export the output to a Google Doc. Modify it as needed.
