INTRODUCTION

Articles need to be written in English and Bahasa using standardized academic writing structure and composition. Manuscripts are typed single space in a quarto paper size (A4), one coloumn, and the number of words is between 3000-7000 words. All parts of the main text are written by using Candara 12, and margin (3,3,3,3). It is important that the file be saved in the native format of the word processor used.

RESEARCH METHOD

This section should provide sufficient details of the experiment, simulation, statistical test or analysis carried out to generate the results so that the method can be repeated by another researcher.

RESULT AND DISCUSSION

The results section should detail the main findings and outcomes of your study. You should use tables only to improve conciseness or where the information cannot be given satisfactorily in other ways such as histograms or graphs. Tables should be numbered serially and referred to in the text by number (table 1, etc.). Each table should have an explanatory caption which should be as concise as possible.

Table 1. Types, Amounts and Percentages of Students' Error

No	Types of Error	Amount	%
1	Lexical Error	125	75
2	Grammatical Error		
	Preposition Error	15	9
	Error in The Use of Tenses	5	3

CONCLUSION

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.
