Summary

Software Engineer with over 5 years of experience in software development and designing technical solutions using modern programming languages like Java, Python, and JavaScript. Specializing in building high-performance web applications, software optimization, and database management. Continuously working to enhance my skills and learn new technologies such as artificial intelligence and cloud application development. Committed to delivering innovative solutions that meet customer needs while ensuring quality and efficiency.

Skill Highlights

- Programming Languages: Java, Python, C++, JavaScript, SQL
- Frameworks: Spring, Django, React, Angular
- Operating Systems: Linux, Windows, macOS
- Databases: MySQL, PostgreSQL, MongoDB
- Development Tools: Git, Docker, Kubernetes, Jenkins
- Cloud Technologies: AWS, Azure
- Software Design: OOP, MVC, Design Patterns

Experience

Software Engineer - 09/2015 to 05/2019
ABC Software, New York

- Designed and developed web applications using Java and React to ensure seamless and efficient user experiences.
- Optimized web application performance and reduced response time by 30% using advanced techniques like caching and parallel processing.
- Developed and optimized databases using MySQL to enhance data retrieval efficiency and reliability.
- Collaborated with cross-functional teams to integrate APIs and implement cloud solutions, improving scalability and performance.

Junior Software Engineer - 09/2014 to 09/2015
XYZ Software, New York

- Assisted in the development of backend services using Python and Django for various internal tools and client projects.
- Participated in code reviews and ensured high code quality through unit testing and documentation.
- Helped design and deploy applications using AWS, contributing to cloud infrastructure and deployment automation.

Education

Bachelor of Science: **Software Engineering - 2014**

Columbia University, NY

Projects

Project Management System | Personal Project

- Developed a comprehensive project management system using React for the frontend and Spring Boot for the backend. Integrated task scheduling, resource management, and reporting features.

E-commerce Platform | Freelance Project

- Created a fully functional e-commerce platform with Python (Django), including product catalogs, shopping cart, and payment gateway integration.
