

Students can use the cells in the grid below to draw key components of their story. One cell per key component. Students can then lay out the visuals they create on the TaleBots grid for the TaleBot to follow.

The pictures below connect to the [Grade 1 Model Story](#). Use them to model the programming portion of the TaleBot lesson.

Students can use the cells in the grid below to draw key components of their story. One cell per key component. Students can then lay out the visuals they create on the TaleBots grid for the TaleBot to follow.
