Iteration Planning: Using Feedback to Refine Your Project
Good Project Year 4 – Lesson 1.9 Handout

Name: _____

Date: _____

Framing Statement:
Now that you've received feedback on your initial prototype, this handout will help you reflect on what you learned and decide what changes you want to make. Revision is an important part of Good Work—it shows that you are listening, adapting, and striving to align your project with your values and your community's needs.

Step 1: What Feedback Did You Receive?
Review the sticky notes or comments you got during the Living Museum. Summarize 2–3 of the most important pieces of feedback below.

1	
2	
3	

Step 2: Prioritizing Feedback
Which piece of feedback are you most interested in using to revise your project? Why?

Are there any pieces of feedback you're choosing not to act on right now? Why?

Step 3: Planning Your Revisions
Describe at least one specific change you want to make to your prototype or idea.

What will you change or adjust?

Why is this change important or meaningful?

How does this change reflect your values or your understanding of the community?

Step 4: Next Steps
What support, materials, or time will you need to make this change?
