

I will be a 4th year graduate student in Ethnomusicology. I've been involved with the GEO since my first year but I became much more active during the strike. This strike was a learning experience that made me realize I want to take on a larger role in the GEO and play a part in shaping the future of the union. As an officer-at-large, I want to encourage more GEO involvement within the College of Fine and Applied Arts. I am currently working with a number of other graduate students within Fine and Applied Arts to achieve this goal and to establish structures that encourage continuous involvement moving forward.
