

Week 9 Onsite Discussion Prompt

Each week you will be given assignments to complete on site. The forum will be used as a space to report on those activities.

For this week's discussion, please discuss with your supervisor/ mentor something that resonated with you from the readings/ class discussions that might be applicable to your site. Then answer:

1. What resonated with you?
2. How does it apply to your site?
3. What was your supervisor's response
4. An example could be around inclusion. In one of the TedTalks we watched the presenter gave some ideas that workplaces could include to support people with disabilities. Is this something that could be incorporated at your site?
