GOMIBAKO TEAM Auditions 2023 Q&A's

1. ***We are a main studio. What is a main studio?***
   A main studio is the studio you represent in the AMV community. This means using icons, banners, and intros. It also means being active in the group chat, helping each other out...etc. In other words we are a family. We are very big on communication and we ask that you at least say hello once a month. We don't want strangers in our family. We want a safe space for everyone.

2. ***Can I be in other studios?***
   Yes, you can. As long as it's not a main team.

3. ***Does this mean I can't use any other banner, and icon that is not from this studio?***
   We ain't as strict as other main teams. We understand that you might have a group that you enjoy editing for or that you are proud to be a member of and that it's okay! It's okay to use other icons and banners. Just as long as you used ours for at least 6 months. That is all we ask for.

4. ***Do I have to use the intro on every single AMV I upload on my channel?***
   Again, no. Like I said we ain't strict like other teams. We want you to feel proud of being on our team but we won't force you. A lot of our members don't use the intro unless they are joining an IC (Iron Chef). This is technically the only time we ask that you should use it since you represent the team but nevertheless like I said we won't force you.

5. ***Do I have to join every single MEP?***
   The short answer is no, you don't. The long answer is *sometimes*. We understand most main teams nowadays are about showcasing individual work but we ain't like most main teams. We believe in teamwork, not just in helping each other out but also in working together on projects. This usually means getting ourselves out of our comfort zones to work with other editors, styles, songs...etc. **We ask that you join one Main MEP out of every 3 main MEPs that we do.** That is one big rule. A lot of our members like stretching themselves and trying new things. It helps a lot when people participate so we can keep growing. Now if this stresses you out just keep in mind this. We've only done ***7 MAIN MEPs*** since we opened the studio. This means that if you had joined us in 2019 you only had the obligation to join *two* of those 7 Main MEPs. Hope that helps put into perspective how long main MEPs take us to do.

6. ***If you guys are a main Team why don't you upload individual work of each member like all the other main studios do?***
   The main reason is that most of our members don't like the idea of re-uploads so why bother? We don't like forcing our members to do things they don't want. This should be for fun not forceful. We are planning on uploading exclusive individual members' work in the future. But no re-uploads.
