ABSTRACT

Abstract should be written using Times New Roman font, size 10pt, not-italics, right justify, and one paragraph-unstructured with single spacing, completed with English title written in bold at the beginning of the English abstract. It should be around 100–250 words the following headings: Introduction, Methods, Results and Conclusions.

Introduction : Explains the problem that is the background and objectives of the research.

Methods: Describe the research design; Participants and how the population was selected, including inclusion and exclusion criteria, instruments used and data analysis used.

Results: Report the main results or findings including levels of statistical significance and confidence intervals where relevant.

Conclusion: Provides conclusions that are relevant to the research objectives, hypotheses and practical implications.

Keywords: Add a minimum of 3 and a maximum of 5 keywords or phrases separated by semicolons (;) for use in indexing this paper; avoid general and plural terms and multiple concepts;

The Full-text manuscript must be double-spaced and formatted in A4 Paper with a 2.54 cm (1 inch) margin on all sides. Please do not use any page numbers, headers or footers, within the paper. We encourage authors to write the full-text manuscript in **no more than 5,000 words**, excluding the abstract, tables/figures, and references. All references should be formatted using [Mendeley](#).

Please be aware that this template is only intended for the conference's full-text submission. The template used in the targetted journals for the final publication may be different from this.

The heading of the article sections must be the followings: Introduction, Methods, Results, Discussion, Conclusions, Acknowledgments (if any), Conflict of Interest, and References.

The headings must be written in **UPPERCASE** format (Times New Roman, Bold, 12pt). The first sub-headings must be written in **Title Case** format (Times New Roman, Bold, 12pt). The second sub-headings must be written in *Sentence case* format (Times New Roman, Italic, 12pt).

INTRODUCTION

The introduction should explain the problems, scale, chronology and state of the arts of the study. Please be noted that the last paragraph of the introduction should include the aims or purpose of study.

METHODS

The methods should clearly explain the research procedure conducted including, but not limited to, study design; population, sample size, and sampling; instruments; intervention procedure (where relevant); data analysis; and ethical clearance.

Study Design

Explain the design and approach used in the study.

Population, Samples and Sampling

Describe the population, total sample, sampling technique used in the study. Inclusion and exclusion criteria (if any) should also be stated in detail. Please also describe all variables involved in the study.

Instruments

Any instrument or questionnaire used in the study must be explained in detail, including general information, total questions, scale or category, reporting criteria, reference, as well as explanation about how to ensure its validity and reliability.

Procedure

Explain the study procedure concisely. It may also describe the study process but should not include the administrative aspect of the study (e.g., chronological order of getting research permission).

Data Analysis

Explain about statistical method(s) used in the study, type of analysis, software(s) that help the analysis, and who conducted the analysis.

Ethical Clearance

Explain the ethical consideration statement and state the number of ethical approval and the issuing institution.

RESULTS

Report the main outcome(s) or findings including levels of statistical significance and confidence intervals where relevant.

If you have any table to present, please format it as the followings. The table should not use any vertical line. The horizontal line is only used in the top, bottom, and header row. The table should be single-spaced with Times New Roman 12pt font (bold for the header, normal for the rest). The title of the table must be placed on the top of the table. The authors should provide concise explanation about the content of the table and give reference which table it explains (e.g. Table 1). Please see the example below.

Table 1. Demographic characteristics of the respondents (example).

Characteristics	n	%
Education		
Not finished	1	0.9
Elementary School	10	9.1
Junior High School	25	22.7
Senior High School	56	50.9
Higher Education	18	16.4

If you have any figure to present, please format it as the followings. The figure must be clearly readable and may not be written one on to of the other. The figure must appear inside the designated margins. It is advisable the use of text boxes in this case. The title of the figure must be placed on the bottom of the figure. Please see the example below.

Figure 1.

DISCUSSION

The discussion should explain the findings and discuss it with the facts, theory and the authors' opinion. The discussion should also explain the limitation of the study.

CONCLUSIONS

Provide conclusions that are relevant to the study aims and hypothesis. Please give brief explanation about the practical implications and recommendation for further research.

ACKNOWLEDGMENT (IF ANY)

Acknowledgments should be limited to the appropriate professionals who contributed to the paper, including technical help and financial or material support, as well as any general support by a department chairperson.

CONFLICT OF INTEREST

Please ensure that a 'Declaration of Conflicting Interests' statement is included at the end of your manuscript, after any acknowledgments and prior to the references. If no conflict exists, please state that 'The Author(s) declare(s) that there is no conflict of interest'.

REFERENCES

The author-year notation system is required and completed. All reference mentioned should be written down in reference using **Vancouver**. Articles have minimal 20 recent references (last 5 years) and 80% are from journal or main references. References from journal publication should be provided by DOI. All cited references must be mentioned in in-text citation and using Mendeley.
