Abstract

Abstract is written concisely and factually, includes the purpose of research, what has been an issue / scope research, objective of the research, clear research methods, presentation of key findings, and significance of the research. Abstract should contain 100 – 150 words.

Keywords: Word 1; word 2; word 3; word 4; word 5 (Include at least 3 to 5 keywords)

A.   Introduction

The introduction consists of background, literature review/previous research, basic concepts/clear theories related to the research problem. Researchers must also mention the position of this research related to previous research in the form of suitability, contradiction and/or relationship. Articles must cite the latest previous research, cite articles published in the previous edition of Edukasia Journal and cite articles indexed by international institutions (Scopus/WoS).

B.   Methods

An overview of the approaches is provided in this discussion. The key contents of this section are (1) research design; (2) population and sample; (3) data collection techniques; (4) and data analysis techniques. Subjects/samples may use initials.

C.   Result and Discussion

The results and discussion contain: 1) research data, which can be in the form of tables (provide references), images (provide references), and easy-to-understand descriptions. The data is then described with an emphasis on important findings from the research; 2) the discussion shows the relationship between the results/important findings of the research with basic concepts and/or theories. The discussion must be written with in-depth analysis and using various aspects of science and its branches. The discussion is also supported by real and clear facts. 3) a critical review that contains a comparison of the suitability or contradiction of the research results with relevant previous research. The main objective is to show the novelty of this article, in addition to showing the scientific characteristics in the form of the continuity of this article with previous research.

1.   Sub Section

For table/picture explanations, it is better to use Table 1, Table 2, or Figure 1, Figure 2 in sequence. Do not use the sentence "like the table below". An example of presenting a picture is as follows:

Enter an image related to your article in this box.

Figure 1. This is an example of a caption for an image

Here is an example of a table presentation:

Table 3. Structure of the Islamic Education Study Program Curriculum

No	Courses
1.	Personality Development Course (*Matakuliah Pengembangan Kepribadian/MPK*)
2.	Science and Skills Courses (*Matakuliah Keilmuan dan Keterampilan/MKK*)
3.	Creative Skills Course (*Matakuliah Keahlian Berkarya/MKB*)
4.	Creative Behavior Course (*Matakuliah Perilaku Berkarya/MPB*)
5.	Community Life Course (*Matakuliah Berkehidupan Bermasyarakat/MBB)*

Further use of sub-chapters in the discussion can be done according to the needs of the discussion. Example:

2.   Sub Section

a.   Sub Section 2 (*Arno Pro* 12, Regular)
1)   Sub Section 3 (*Arno Pro* 12, Regular)
a)   Sub Section 4 (*Arno Pro* 12, Regular)
For direct quotations, use 1 space, for example:

"The research results describe the main findings of the research. If the research results are presented in the form of tables or figures, then only a short sentence is needed to support the table or figure presented. Tables and figures are included in the body of the manuscript. Table and figure titles are numbered and written in minion pro font 9, spaced 1. For images, it is better to use a pixel size of 300 for optimal image sharpness and quality (Ghazali, 2009, p. 28)."

D.   Conclusion

The conclusion is the essence of the discussion and should be the answer to the research question. It is written in narrative form, not in numerical/numbering form. Suggestions are given based on the research results.

The references used must be primary reference sources such as journals (including international journals) and proceedings as much as 80% and 20% secondary reference sources (books) published in the last 10 years. Citations are written in Body note form using the 7th Edition APA format. For writing examples, it can be done like this (Nata, 2000, p. 45). It is required by (Atiqoh, 2017, p. 20) to use a bibliography management application such as: Mendeley or Zotero (it is recommended to use Mendeley).

E.   Acnowledgment
